

SB 673 SYMPOSIUM

CUMULATIVE IMPACTS COMMUNITY VULNERABILITY

The Department of Toxic Substances Control (DTSC) invites you to the second of two symposia for SB 673 that aims to improve the Department's permitting process and considers including additional criteria to address community concerns when making permit decisions.

The symposium covers the requirement for the Department to consider criteria for vulnerable populations, cumulative impacts, and setback distances from locations for sensitive receptors, such as schools, daycare centers, and hospitals. Meaningful public participation and best available science are important to the development of cumulative impact standards and policy considerations for issuance of a hazardous waste facility permit.

A partial list of featured speakers:

- **Barbara A. Lee**, *Director, DTSC*
- **Ana Mascareñas, MPH**
Assistant Director for Environmental Justice and Tribal Affairs, DTSC
