

**Department of Toxic Substances Control
Project Status Update
For
Wyle Laboratories Norco Facility Site
June 28, 2004**

SITE INVESTIGATION/CLEANUP DOCUMENTS

- DTSC evaluated comments received from Kleinfelder and community members on the RI Workplan, and is awaiting comments from the CAG. DTSC will evaluate and incorporate these comments into the investigation as appropriate. DTSC is drafting its comments on the RI Workplan and anticipates issuing formal comments to Wyle during the week of June 28.
- DTSC is reviewing the draft Boundary Assessment report. The report documents boundary sampling activities and presents sampling results. Soil gas sampling data along Golden West Lane will be incorporated into the final report.

INVESTIGATION/CLEANUP FIELD WORK

- Groundwater cleanup system operation is ongoing.
- Soil Gas data collected from residential properties along Golden West Lane is undergoing data validation. DTSC anticipates that data validation will be completed within 30 days. Data will be released after completion of the data validation process.
- DTSC is currently evaluating the preliminary soil gas results from samples collected on residential properties along Golden West Lane.

PUBLIC PARTICIPATION:

- DTSC is preparing to discuss preliminary results with the residents along Golden West Lane where soil gas samples were collected. An informational package will be shared with the residents this week. The preliminary results will be discussed with the CAG after the residents have been notified.
