

**Department of Toxic Substances Control
Project Status Update
for
Wyle Laboratories Norco Facility Site
October 13, 2006**

Activities completed last week: (See attached map)

Last week

Onsite:

- Continued preparation of SVE system for conversion to 2-Phase during pilot test.
- Initiated drilling of five deep wells installed as part of the Demonstration Plan.
- Completed sampling of wells drilled as part of the Demonstration Plan.

Offsite:

- Continued collecting vacuum measurements in monitoring and extraction wells associated with the extraction system on the Wyle property near Golden West Lane. The system is pulling vapors from underneath homes at the terminus of Golden west lane.
- Continued performance of operations and maintenance activities for soil vapor extraction system.

Activities planned for this week (See attached map for all the designated locations)

Onsite:

- Continue Operations and Maintenance (O&M) activities on Compounds Two, Three, and Four in Areas F and H onsite.
- Conduct bi-weekly water levels measurements for groundwater monitoring wells.
- Develop and sample five deep wells installed for monitoring of permanganate treatment.
- Initiate piezometer installation for Aquifer Test and 2-Phase Pilot test.

Offsite:

- Conduct bi-weekly water levels measurements for groundwater monitoring wells.
- Continue collecting vacuum measurements in monitoring and extraction wells associated with the extraction system on the Wyle property near Golden West Lane.
- Conduct quarterly soil gas sampling of permanent vapor probes VW-1 through VW-23.

PUBLIC PARTICIPATION

- DTSC plans to attend Norco City Council meeting on October 18, 2006.
