

**Department of Toxic Substances Control
Project Status Update
for
Wyle Laboratories Norco Facility Site
October 23, 2006**

Activities completed last week: (See attached map)

Last week

Onsite:

- Conducted Operation and Maintenance (O&M) activities on Compounds Two, Three, and Four in Areas F and H onsite.
- Developed and sampled five deep wells installed for monitoring of permanganate treatment.
- Initiated installation and development of piezometer wells to measure water levels for Aquifer Test and 2-Phase Pilot test.
- Continued preparation of SVE system for conversion to 2-Phase during pilot test.
- Collected bi-weekly water level measurements in on-site wells MW-14 and MW-15.

Offsite:

- Conducted quarterly air sampling of residence at 2281 Golden West Lane.
- Continued collecting vacuum measurements in monitoring and extraction wells associated with the extraction system on the Wyle property near Golden West Lane. The system is pulling vapors from underneath homes at the terminus of Golden west lane.
- Collected bi-weekly water level measurements in off-site wells MW-16 and MW-19 through MW-31.
- Continued performance of operations and maintenance activities for soil vapor extraction system.
- Conducted quarterly soil gas sampling of vapor probes VW-1 through VW-23.

Activities planned for this week (See attached map for all the designated locations)

Onsite:

- Initiate quarterly sampling of coreholes and extraction wells.
- Initiate installation of pumps in MW wells.
- Continue developing/sampling five deep wells installed for monitoring of permanganate treatment.
- Continue installation and development of piezometer wells to measure water levels for Aquifer Test and 2-Phase Pilot test.
- Conduct O&M activities on Compounds Two, Three, and Four in Areas F and H onsite.

Offsite:

- Continue collecting vacuum measurements in monitoring and extraction wells associated with the extraction system on the Wyle property near Golden West Lane.

PUBLIC PARTICIPATION

- None to report.
