Governor

### **Department of Toxic Substances Control (DTSC) Project Status Update for Former Wyle Laboratories Norco Facility Site May 23, 2008**

The public comment period continues until May 30, 2008 for draft Removal Action Work Plan (RAW). The RAW proposes to excavate contaminated soil from three small areas: 1) lead-impacted soil from Area J14; 2) polychlorinated bi-phenyls (PCB) impacted soil from Area J11; and, 3) perchlorate-impacted soil from Area J11. The total amount of excavated soil is estimated at 105 cubic yards. The proposed soil excavation will be completed in less than 10 days. Confirmation sampling will be conducted after excavation to ensure the contamination is removed and remedial goals are achieved.

This RAW is not the final remedy for the site. Groundwater contamination is currently being investigated. A cleanup plan to address impacted groundwater will be available for review in the future.

#### **Activities completed last week**

##### Onsite:

- Continued operations of HCS; Conducted routine operations and maintenance (O&M) for HCS;
- Conducted O&M activities for soil vapor extraction system;

#### **Activities planned for this week**

##### Onsite:

- Continue O&M activities for soil vapor extraction system;
- Perform O&M activities for HCS;
