

**NOTICE OF PUBLIC COMMENT PERIOD
DRAFT CLOSURE PLAN AVAILABLE FOR REVIEW
Crane Company, Hydro-Aire Division
Burbank, California**

PUBLIC COMMENT PERIOD: June 30, 2011 to August 2, 2011

The Department of Toxic Substances Control (DTSC) invites you to review and comment on the draft "Closure Plan for Former Plating Room and Wastewater Treatment System Areas" (Closure Plan) for the Crane Company, Hydro-Aire Division (Hydro-Aire) facility. The Hydro-Aire facility is located at 3000 Winona Avenue, Burbank, approximately a quarter mile east of the Bob Hope Airport, in Los Angeles County. The U.S. Environmental Protection Agency (EPA) identification number for this facility is CAD008388720.

The Closure Plan provides information about the facility and a plan for collection and analysis of soil and soil gas samples to determine volatile organic compound (VOC) concentrations. Evaluation of the new VOC data in conjunction with the results of previous investigations will be used to determine if closure of the former plating room and wastewater treatment system areas has achieved human health risk standards. It is anticipated that the closure results will confirm that the facility meets industrial use standards, so a Land Use Covenant (LUC) is proposed to restrict future use of the property. DTSC has prepared a Notice of Exemption for this project pursuant to the California Environmental Quality Act (CEQA).

PUBLIC COMMENT PERIOD – The 30-day public comment period will begin on **June 30, 2011, and ends August 2, 2011**. DTSC encourages you to review and comment on the draft Closure Plan and the proposed LUC. All comments must be submitted **no later than August 2, 2011**. Please submit comments to:
