

**California Environmental Protection Agency
Department of Toxic Substances Control**

**HAZARDOUS WASTE POST CLOSURE FACILITY PERMIT
DRAFT**

Facility Name:

**Square D Company
1060 East Third Street
Beaumont, California 92223**

Facility EPA ID Number: CAD050746775

Effective Date: [month, day, year]

Expiration Date: [month, day, year]

Operator Name:

**Square D Company
1415 South Roselle Road
Palatine, Illinois 60067**

Owner Name:

**Square D Company
1415 South Roselle Road
Palatine, Illinois 60067**

Pursuant to California Health and Safety Code section 25200, this Resource Conservation and Recovery Act (RCRA) equivalent Hazardous Waste Facility Permit is hereby issued to the owner and operator named above.

The Issuance of this Permit is subject to the terms and conditions set forth in the Approved Post-Closure Permit Renewal Application dated February 2008. The Permit consists of 25 pages and Figures 1 and 2.

PART V. SPECIAL CONDITIONS 24

PART VI. CORRECTIVE ACTION 25

PART I. DEFINITIONS

All terms used in this Permit shall have the same meaning as those terms have in the California Health and Safety Code, division 20, chapter 6.5 and California Code of Regulations, title 22, division 4.5, unless expressly provided otherwise by this Permit.

1. **"DTSC"** as used in this Permit means the California Department of Toxic Substances Control.
2. **"Facility"** as used in this Permit means all contiguous land and structures, other appurtenances, and improvements on the land used for the treatment, transfer, storage resource recovery, disposal or recycling of hazardous waste. A hazardous waste facility may consist of one or more treatment, transfer, storage, resource recovery, disposal or recycling operational units or combinations of these units.

For the purpose of implementing corrective action under California Code of Regulations, title 22, division 4.5, a hazardous waste facility includes all contiguous property under the control of the owner or operator required to implement corrective action.

3. **"Permittee"** as used in this Permit means the Owner and Operator.
4. **"RCRA"** as used in this Permit means the Resource Conservation and Recovery Act (42 U.S.C. §6901 et seq.).

PART II. DESCRIPTION OF THE FACILITY AND OWNERSHIP

1. Owner of Facility

Square D Company
1717 Centerpark Road
Lincoln, Nebraska 68512

2. Owner of Real Property

Square D Company
1717 Centerpark Road
Lincoln, Nebraska 68512

3. Operator of Facility

Square D Company
1717 Centerpark Road
Lincoln, Nebraska 68512

4. Location

The Square D Company (Facility) is located at the northwest corner of Third Street and Pennsylvania Avenue within Section 10 of Township 3 South, Range 1 West, San Bernardino Base & Meridian. The Facility is listed in Assessor Parcel Number 418-360-001. The Facility occupies 2.186 acres that is zoned as an industrial area.

The Facility is bounded by a railroad right-of-way to the north; and Priority Pallets Company to the east, west and south. Access to the Facility is through the Priority Pallets Company (See Figure No. 1 for the location of the Facility).

5. Description of Facility Operations

The Facility is currently conducting groundwater monitoring and cover maintenance under post-closure for seven post-closure care units.

Prior to closure, the Facility was a copper sheet and foil manufacturer that ceased its operation in 1990. It used pure copper wire or equivalent solid copper materials which were dissolved in sulfuric acid, resulting in a concentrated copper sulfate solution. The elemental copper was deposited from this solution onto a drum by electroplating, producing a thin copper foil roll. The foil was removed from the drum and treated with copper sulfate, zinc sulfate, and chromic acid solutions to prevent oxidation.

During the Facility's active operation, the Facility generated liquid and solid waste.

The liquid waste included spent plating bath and wastewater containing metal ions (antimony, arsenic, barium, cadmium, copper, chromium, hexavalent chromium, mercury, nickel, zinc and lead), spent non-halogenated solvents, drum sludges and lubricant oils. These solid and liquid wastes were treated and stored in surface impoundments which were regulated under an interim status document issued in March 1981.

6. Facility History

From 1970 to 1989, the Facility operated on approximately nine acres of land. In March 1981, DTSC issued an Interim Status Document to the Facility to operate the hazardous waste surface impoundments. The Facility ceased its manufacturing activities in 1989 and closed in 1990.

The Facility closed the regulated units (surface impoundments) in 1988 under a DTSC-approved Closure Plan dated May 20, 1988. Closure activities included two areas: the South Post-Closure Area and the North Post-Closure Area.

Closure activities for the South Post-Closure Area included removing the liners and waste constituents from surface impoundments. Groundwater monitoring was performed for the next three years. In June 1996, DTSC acknowledged the clean closure of the South Post-Closure Area.

Closure activities for the North Post-Closure Area included removing the liners from the seven surface impoundments and capping any residual waste constituents in place under one continuous cap. DTSC acknowledged the closure certification on February 27, 1990, and requested a post-closure permit application for the North Post-Closure Area. DTSC issued a post-closure permit on March 28, 1998 for long-term groundwater monitoring and cover integrity maintenance. The North Post-Closure Area was permitted as one unit and includes the seven surface impoundments described in Part IV of this Permit and a Water Plant which was used to remove sulfate from non-hazardous wastewater. The Water Plant was not a hazardous waste management unit.

On December 22, 1999, the Square D Company sold a majority of the site to the Priority Pallets Company. The Square D Company continues ownership of the 2.186 acres known as the North Post-Closure Area.

In addition to the closure activities, the Facility conducted corrective action activities for the entire site. All corrective action was completed in 2000. Groundwater monitoring continues for the North Post-Closure Area under the post-closure permit. On June 19, 2000, DTSC approved a Class 3 Permit Modification to reflect the completion of the corrective action at the Facility. The 1998 permit required the post-closure care for the North Post-Closure Area for 30 years.

In October 2007, the Square D Company submitted a post-closure permit renewal application to continue the groundwater monitoring and cover maintenance of the North Post-Closure Area. The post-closure permit application proposed some changes which include: (1) modification of the Facility boundary which is limited to the North Post-Closure Area; (2) reinforcement of a small portion of the North Post-Closure Area to allow truck traffic; (3) installation of a permanent fence to restrict the truck access to the Facility; and (4) installation of an additional groundwater well.

7. Facility Size and Type for Fee Purposes

The Facility is categorized as a medium post-closure facility pursuant to Health and Safety Code section 25205.7(d)(5). For the purpose of Health and Safety Code section 25205.4, the post-closure period for the Facility shall be deemed to have started on March 28, 1998.

PART III. GENERAL CONDITIONS

1. PERMIT APPLICATION DOCUMENTS

The DTSC-approved Post-Closure Permit Renewal Application dated February 2008 (Approved Application) is hereby made a part of this Permit by reference.

2. EFFECT OF PERMIT

- (a) The Permittee shall comply with the terms and conditions of this Permit and the provisions of the Health and Safety Code and California Code of Regulations (Cal. Code Regs.), title 22, division 4.5. The issuance of this Permit by DTSC does not release the Permittee from any liability or duty imposed by federal or state statutes or regulations or local ordinances, except the obligation to obtain this Permit. The Permittee shall obtain the permits required by other governmental agencies, including but not limited to, those required by the applicable land use planning, zoning, hazardous waste, air quality, water quality, and solid waste management laws for the construction and/or operation of the Facility.
- (b) The Permittee is permitted to operate, monitor and maintain this Facility for post closure activities in accordance with the terms and conditions of this Permit and the Approved Application. Any management of hazardous wastes not specifically authorized in this Permit is strictly prohibited.
- (c) Compliance with the terms and conditions of this Permit does not constitute a defense to any action brought under any other law governing protection of public health or the environment, including, but not limited to, one brought for any imminent and substantial endangerment to human health or the environment.
- (d) DTSC's issuance of this Permit does not prevent DTSC from adopting or amending regulations that impose additional or more stringent requirements than those in existence at the time this Permit is issued and does not prevent the enforcement of these requirements against the Permittee.
- (e) Failure to comply with any term or condition set forth in the Permit in the time or manner specified herein will subject the Permittee to possible enforcement action including but not limited to penalties pursuant to Health and Safety Code section 25187.
- (f) Failure to submit any information required in connection with the Permit, or falsification and/or misrepresentation of any submitted information, is grounds for revocation of this Permit (Cal. Code Regs., tit. 22, §66270.43).

- (g) In case of conflicts between the Approved Application and the Permit, the Permit conditions take precedence.
- (h) This Permit includes and incorporates by reference any conditions of waste discharge requirements issued to the Facility by the State Water Resources Control Board or any of the California Regional Water Quality Control Boards and any conditions imposed pursuant to section 13227 of the Water Code.

3. COMPLIANCE WITH CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA)

A Notice of Exemption has been prepared in accordance with the requirements of Public Resources Code section 21000 et seq. and the CEQA Guidelines, section 21000 et seq. of California Code of Regulations, title 14.

4. ENVIRONMENTAL MONITORING

The Permittee shall comply with the applicable environmental monitoring and response program requirements of California Code of Regulations, title 22, division 4.5, chapter 14, articles 6 and 17.

- (a) For the purpose of title 22, California Code of Regulations, section 66264.91(b), the elements of the Water Quality Monitoring and Response Program (GWMRP) for the Facility are those described in the Post-Closure Permit Application, Appendix 5 (Water Quality Sampling and Analysis Plan).
- (b) For the purpose of title 22, California Code of Regulations, section 66264.92, the Water Quality Protection Standard for the Facility is described in the Post-Closure Permit Application, Section G.1.f and Appendix 5 (Section 10.1.1.)
- (c) For the purpose of title 22, California Code of Regulations, section 66264.93, the Constituents of Concern (COC) for the Facility are described in the Post-Closure Permit Application, Section G.1.e Group (3) and Appendix 5, Section 4.3. During future sampling events, if the Facility finds Appendix IX constituents in the groundwater that are not already identified in the GWMRP as COCs, the Facility shall add them to the list of COCs.
- (d) For the purpose of title 22, California Code of Regulations, section 66264.94, the Concentration Limits for the Facility are described in Post-Closure Permit Application, Section G.1.f. and Appendix 5 (Section 10.1.1).

- (e) For the purpose of title 22, California Code of Regulations, section 66264.95, the Monitoring Points and Points of Compliance are described in the Post-Closure Permit Application, Appendix 5, Section 3.2.
- (f) For the purpose of title 22, California Code of Regulations, section 66264.96, the Compliance Period for each regulated unit at the Facility shall be 30 years beginning on March 28, 1998. DTSC may extend the post-closure monitoring period beyond the 30 year to protect human health and the environment.
- (g) For the purpose of title 22, California Code of Regulations, section 66270.31, the recording and reporting of monitoring results for the Facility is described in the Post-Closure Permit Application, Appendix 5, Section 9.

5. ACCESS

- (a) DTSC, its contractors, employees, agents, and/or any United State Environmental Protection Agency representatives are authorized to enter and freely move about the Facility for the purposes of interviewing Facility personnel and contractors; inspecting records, operating logs, and contracts relating to the Facility; reviewing progress of the Permittee in carrying out the terms of Part VI of the Permit; conducting such testing, sampling, or monitoring as DTSC deems necessary; using a camera, sound recording, or other documentary-type equipment; verifying the reports and data submitted to DTSC by the Permittee; or confirming any other aspect of compliance with this Permit, Health and Safety Code, division 20, chapter 6.5, and California Code of Regulations, title 22, division 4.5. The Permittee shall provide DTSC and its representatives access at all reasonable times to the Facility and any other property to which access is required for implementation of any provision of this Permit, Health and Safety Code, division 20, chapter 6.5, and California Code of Regulations, title 22, division 4.5, and shall allow such persons to inspect and copy all records, files, photographs, documents, including all sampling and monitoring data, that pertain to work undertaken pursuant to the entire Permit or undertake any other activity necessary to determine compliance with applicable requirements.
- (b) Nothing in this Permit shall limit or otherwise affect DTSC's right to access and entry pursuant to any applicable State or federal laws and regulations.

6. POST-CLOSURE COST ESTIMATE

The post closure cost estimate approved in 2008 is \$737,100.00 (in 2008 dollars) for the post-closure period from the year 2008 to 2028.

PART IV. PERMITTED UNITS AND ACTIVITIES

This Permit authorizes the operation, monitoring and maintenance only of the facility units and activities listed below. The Permittee shall not treat, store or otherwise manage hazardous waste in any unit other than those specified in this Part IV. Any modifications to a unit or activity authorized by this Permit require the written approval of DTSC in accordance with the permit modification procedures set forth in California Code of Regulations, title 22, division 4.5.

For the purpose of California Code of Regulations, title 22, section 66270.1(c) and other similar, unit-specific regulatory requirements, this Facility has seven Hazardous Waste Management Units under postclosure care. Collectively these units are known as the North Post-Closure Area. These units are described in detail in the Approved Application and are as follows:

UNIT 1 - NAME:

Process Pond 1

UNIT 1 - LOCATION:

Southeast corner of the Facility (see Figure No. 2)

UNIT 1 - ACTIVITY TYPE:

This unit is a closed surface impoundment subject to post-closure requirements including groundwater monitoring and cap maintenance.

UNIT 1 - ACTIVITY DESCRIPTION:

This unit is currently closed. It was a surface impoundment used to store spent copper rinse water.

UNIT 1 - PHYSICAL DESCRIPTION:

This unit was a hypalon-lined settling basin which measured approximately 100 by 50 feet. This unit was closed, the liner removed, and contaminants were capped in place. A continuous cover system covers the entire Facility including Unit 1. This cover consists of an asphalt cap, class 2 base rock, moisture barriers and a leak detection system.

UNIT 1 - MAXIMUM CAPACITY:

This unit is currently closed and does not accept any waste.

UNIT 1 - WASTE TYPES:

This unit is currently closed and does not accept any waste. The wastewater previously handled by the unit was contaminated with copper.

UNIT 1 - RCRA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 1 - CALIFORNIA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 1 - UNIT-SPECIFIC SPECIAL CONDITIONS:

None.

UNIT 1 - AIR EMISSION STANDARDS:

This unit is currently closed. This Unit is not subject to the air emission standards.

UNIT 2 - NAME:

Process Pond 2

UNIT 2 - LOCATION:

East side of the Facility (see Figure No. 2)

UNIT 2 - ACTIVITY TYPE:

This unit is a closed surface impoundment subject to post-closure requirements including groundwater monitoring and cap maintenance.

UNIT 2 - ACTIVITY DESCRIPTION:

This unit is currently closed. It was a surface impoundment used as part of a wastewater treatment system and as a settling basin for wastewater from the electroplating process.

UNIT 2 - PHYSICAL DESCRIPTION:

This unit was a hypalon-lined settling basin which measured approximately 90 x 40 x 5 feet. This unit was closed, the liner removed, and contaminants were capped in place. A continuous cover system covers the entire Facility including Unit 2. This cover consists of an asphalt cap, class 2 base rock, moisture barriers and a leak detection system.

UNIT 2 - MAXIMUM CAPACITY:

This unit is currently closed and does not accept any waste.

UNIT 2 - WASTE TYPES:

This unit is currently closed and does not accept any waste. The wastewater previously handled by the unit was acidic and contaminated with copper, zinc, chromium, arsenic, antimony.

UNIT 2 - RCRA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 2 - CALIFORNIA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 2 - UNIT-SPECIFIC SPECIAL CONDITIONS:

None.

UNIT 2 - AIR EMISSION STANDARDS:

This unit is currently closed. This Unit is not subject to the air emission standards.

UNIT 3 - NAME:

Process Pond 3

UNIT 3 - LOCATION:

Northeast corner of the Facility (see Figure No. 2)

UNIT 3 - ACTIVITY TYPE:

This unit is a closed surface impoundment subject to post-closure requirements including groundwater monitoring and cap maintenance.

UNIT 3 - ACTIVITY DESCRIPTION:

This unit is currently closed. It was a surface impoundment used to store copper sulfate solution.

UNIT 3 - PHYSICAL DESCRIPTION:

This unit was a hypalon-lined settling basin which measured approximately 90 x 40 x 5 feet. This unit was closed, the liner removed, and contaminants were capped in place. A continuous cover system covers the entire Facility including Unit 3. This cover consists of an asphalt cap, class 2 base rock, moisture barriers and a leak detection system.

UNIT 3 - MAXIMUM CAPACITY:

This unit is currently closed and does not accept any waste.

UNIT 3 - WASTE TYPES:

This unit is currently closed and does not accept any waste. The wastewater previously handled by the unit was acidic and contaminated with copper, zinc, chromium, arsenic, antimony.

UNIT 3 - RCRA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 3 - CALIFORNIA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 3 - UNIT-SPECIFIC SPECIAL CONDITIONS:

None.

UNIT 3 - AIR EMISSION STANDARDS:

This unit is currently closed. This Unit is not subject to the air emission standards.

UNIT 4 - NAME:

Barium Pond

UNIT 4 - LOCATION:

South side of the Facility (see Figure No. 2)

UNIT 4 - ACTIVITY TYPE:

This unit is a closed surface impoundment subject to post-closure requirements including groundwater monitoring and cap maintenance.

UNIT 4 - ACTIVITY DESCRIPTION:

This unit is currently closed. It was a surface impoundment used to store barium sulfate sludge generated from the wastewater treatment system.

UNIT 4 - PHYSICAL DESCRIPTION:

This unit was an asphalt-lined settling basin which measured approximately 70 x 70 x 2 feet. This unit was closed, the liner removed, and contaminants were capped in place. A continuous cover system covers the entire North Post-Closure Area including Unit 4. This cover consists of an asphalt cap, class 2 base rock, moisture barriers and a leak detection system.

UNIT 4 - MAXIMUM CAPACITY:

This unit is currently closed and does not accept any waste.

UNIT 4 - WASTE TYPES:

This unit is currently closed and does not accept any waste. The sludge previously handled by this unit was contaminated with copper, zinc, chromium, arsenic, antimony and lead.

UNIT 4 - RCRA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 4 - CALIFORNIA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 4 - UNIT-SPECIFIC SPECIAL CONDITIONS

None.

UNIT 4 - AIR EMISSION STANDARDS:

This unit is currently closed. This Unit is not subject to the air emission standards.

UNIT 5 - NAME:

Carbon Pond

UNIT 5 - LOCATION:

Southeast corner of the Facility (see Figure No. 2)

UNIT 5 - ACTIVITY TYPE:

This unit is a closed surface impoundment subject to post-closure requirements including groundwater monitoring and cap maintenance.

UNIT 5 - ACTIVITY DESCRIPTION:

This unit is currently closed. It was a surface impoundment used as part of a wastewater treatment system and as a storage basin for solid waste generated by the Facility.

UNIT 5 - PHYSICAL DESCRIPTION:

This unit was an asphalt-lined basin which measured approximately 70 x 70 x 2 feet. This unit was closed, the liner removed, and contaminants were capped in place. A continuous cover system covers the entire Facility including Unit 5. This cover consists of an asphalt cap, class 2 base rock, moisture barriers and a leak detection system.

UNIT 5 - MAXIMUM CAPACITY:

This unit is currently closed and does not accept any waste.

UNIT 5 - WASTE TYPES:

This unit is currently closed and does not accept any waste. The sludge previously handled by the unit was contaminated with copper, zinc, chromium, arsenic, antimony and lead.

UNIT 5 - RCRA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 5 - CALIFORNIA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 5 - UNIT-SPECIFIC SPECIAL CONDITIONS:

None.

UNIT 5 - AIR EMISSION STANDARDS:

This unit is currently closed. This Unit is not subject to the air emission standards.

UNIT 6 - NAME:

South Settling Pond

UNIT 6 - LOCATION:

Center of the Facility (see Figure No. 2)

UNIT 6 - ACTIVITY TYPE:

This unit is a closed surface impoundment subject to post-closure requirements including groundwater monitoring and cap maintenance.

UNIT 6 - ACTIVITY DESCRIPTION:

This unit is currently closed. It was a surface impoundment used to store the metal hydroxide filter cake and sludge generated from the wastewater treatment system. The filter cakes and sludge were dried over a six-month period then removed and sold off-site.

UNIT 6 - PHYSICAL DESCRIPTION:

This unit was an asphalt-lined settling basin which measured approximately 195 x 75 x 3 feet. This unit was closed, the liner removed, and contaminants were capped in place. A continuous cover system covers the entire North Post-Closure Area including Unit 6. This cover consists of an asphalt cap, class 2 base rock, moisture barriers and a leak detection system.

UNIT 6 - MAXIMUM CAPACITY:

This unit is currently closed and does not accept any waste.

UNIT 6 - WASTE TYPES:

This unit is currently closed and does not accept any waste. The sludge previously handled by the unit was contaminated with copper, zinc, chromium, arsenic, antimony and lead.

UNIT6 - RCRA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 6 - CALIFORNIA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 6 - UNIT-SPECIFIC SPECIAL CONDITIONS [OPTIONAL]:

None.

UNIT 6 - AIR EMISSION STANDARDS:

This unit is currently closed. This Unit is not subject to the applicable requirements of air emission standards.

UNIT 7 - NAME:

North Settling Pond

UNIT 7 -LOCATION:

North side of the Facility (see Figure No. 2).

UNIT 7 -ACTIVITY TYPE:

This unit is a closed surface impoundment subject to post-closure requirements including groundwater monitoring and cap maintenance.

UNIT 7 -ACTIVITY DESCRIPTION:

This unit is currently closed. It was a surface impoundment used to store the metal hydroxide filter cake and sludge generated from the wastewater treatment system. The filter cakes and sludge were dried over a six-month period then removed and sold off-site.

UNIT 7 -PHYSICAL DESCRIPTION:

This unit was an asphalt-lined settling basin which measured approximately 195 x 115 x 4 feet. This unit was closed, the liner removed, and contaminants were capped in place. A continuous cover system covers the entire North Post-Closure Area including Unit 7. This cover consists of an asphalt cap, class 2 base rock, moisture barriers and a leak detection system.

UNIT 7 - MAXIMUM CAPACITY:

The unit is currently closed and does not accept any waste.

UNIT 7 - WASTE TYPES:

This unit is currently closed and does not accept any waste. The sludge previously handled by the unit was contaminated with copper, zinc, chromium, arsenic, antimony and lead.

UNIT 7 - RCRA HAZARDOUS WASTE CODES:

This unit is currently closed and does not accept any hazardous waste.

UNIT 7 - CALIFORNIA HAZARDOUS WASTE CODES: (if any)

This unit is currently closed and does not accept any hazardous waste.

UNIT 7 - UNIT-SPECIFIC SPECIAL CONDITIONS [OPTIONAL]:

None.

UNIT 7 - AIR EMISSION STANDARDS:

This unit is currently closed. This Unit is not subject to the applicable requirements of air emission standards.

PART V. SPECIAL CONDITIONS

1. Within six months of the effective date of this Permit, the Permittee shall finish the installation of the permanent fence according to the Work Plan in Appendix 13 of the Part B Application. The Permittee shall send notice to DTSC when the work has been completed.
2. The Permittee shall allow only pallet storage and forklift traffic within the fenced area of the Facility.
3. Within six months of the effective date of this Permit, the Permittee shall initiate the installation of the groundwater monitoring well (SDB-7B) as proposed in Appendix 9 of the Part B Application.
4. Within six months of the effective date of this Permit, the Permittee shall initiate the cap reinforcement as proposed in the technical memorandums located in Appendix 12 of the Part B Application.

PART VI - CORRECTIVE ACTION

1. In the event the Permittee identifies an immediate or potential threat to human health and/or the environment, discovers new releases of hazardous waste and/or hazardous constituents, or discovers new Solid Waste Management Units (SWMUs) not previously identified, the Permittee shall notify DTSC orally within 24 hours of discovery and notify DTSC in writing within 10 days of such discovery summarizing the findings including the immediacy and magnitude of any potential threat to human health and/or the environment.
2. DTSC may require the Permittee to investigate, mitigate and/or take other applicable action to address any immediate or potential threats to human health and/or the environment and newly identified SWMUs or releases of hazardous waste and/or hazardous constituents. If and when corrective action is required at the Facility, the Permittee shall conduct corrective action under either a Corrective Action Consent Agreement or an Enforcement Order for Corrective Action issued by DTSC pursuant to Health and Safety Code sections 25187 and 25200.10.
3. To the extent that work being performed pursuant to Part VI of the Permit must be done on property not owned or controlled by the Permittee, the Permittee shall use its best efforts to obtain access agreements necessary to complete work required by this Part of the Permit from the present owner(s) of such property within 30 days of approval of any workplan for which access is required. "Best efforts" as used in this paragraph shall include, at a minimum, a certified letter from the Permittee to the present owner(s) of such property requesting access agreement(s) to allow the Permittee and DTSC and its authorized representatives access to such property and the payment of reasonable sums of money in consideration of granting access. The Permittee shall provide DTSC with a copy of any access agreement(s). In the event that agreements for the access are not obtained within 30 days of approval of any workplan for which access is required, or of the date that the need for access becomes known to the Permittee, the Permittee shall notify DTSC in writing within 14 days thereafter regarding both efforts undertaken to obtain access and its failure to obtain such agreements. In the event DTSC obtains access, the Permittee shall undertake approved work on such property. If there is any conflict between this permit condition on access and the access requirements in any agreement entered into between DTSC and the Permittee, this permit condition on access shall govern.
4. Nothing in Part VI of the Permit shall be construed to limit or otherwise affect the Permittee's liability and obligation to perform corrective action including corrective action beyond the facility boundary, notwithstanding the lack of access. DTSC may determine that additional on-site measures must be taken to address releases beyond the Facility boundary if access to off-site areas cannot be obtained.
