Maria Fabella
Project Manager, Department of Toxic Substances Control
1011 N. Grandview Ave.
Glendale, California 91201
(818) 551-2918

SUBJECT: REQUEST FOR CLASS 2 PERMIT MODIFICATION AND FACILITY CLOSURE, LOS ANGELES COUNTY DEPARTMENT OF AGRICULTURAL COMMISSIONER/WEIGHTS AND MEASURES, 8841 EAST SLAUSON AVENUE, PICO RIVERA, CALIFORNIA

Dear Ms. Fabella,

This letter, prepared on behalf of the Los Angeles County Department of Agricultural Commissioner/Weights and Measures (ACWM), constitutes a request for a Resource Conservation and Recovery Act (RCRA) Class 2 Permit Modification in accordance with Title 22, California Code of Regulations, Section 66270.24(b). It is understood that public notice will be required in connection with the permit modification request.

The permit modification relates to the Closure Plan (CP) dated November 2006 (revised January 2007), recently determined by the Department of Toxic Substances Control (DTSC) to be technically complete (letter of March 2, 2007 to Mr. Ray Smith of ACWM). The CP was developed based on current site conditions, as determined during the RCRA Facility Investigation (RFI) and documented in the RFI Report (SCS, July 2001), and replaces a closure plan that was included by reference into the facility's 1985 RCRA permit.

This letter also requests a Completion of Corrective Action determination as a result of the RFI process, as described in the Supplemental RFI Report (SCS, February 2007), which document was approved by DTSC (letter of March 16, 2007). Simultaneous public notice will be conducted for the requested Completion of Corrective Action determination. Implementation of the CP, as well as the Completion of Corrective Action, will follow approval of these items.

If you have any questions or need any additional information regarding this request, please call me at (562) 426-9544.

Sincerely,

Kenneth H. Lister, Ph.D., C.E.G.
Senior Technical Manager
SCS ENGINEERS
