

**Department of Toxic Substances Control  
Project Status Update  
for  
Wyle Laboratories Norco Facility Site  
December 27, 2005**

**SITE INVESTIGATION/CLEANUP**

- Wyle will conduct more offsite sampling in the area northwest of the Wyle property. This sampling, which will begin the first week of January, will include:
  - soil gas and shallow groundwater sampling, and installing a groundwater monitoring well near the southern boundary of Norco Intermediate School
  - soil gas and shallow groundwater sampling, and installing groundwater monitoring wells near the northern and southern boundary of Norco High School
  - soil gas and shallow groundwater sampling along Temescal Avenue
  - installing two groundwater monitoring wells on Hillside Avenue between Norco High School and the Wyle property.
  
- The operation of the vapor extraction system is anticipated to start this week. The vapor extraction system will help prevent vapor intrusion into the homes at the southern end of Golden West lane. Wyle plans to operate the system for two weeks and then will conduct indoor air sampling to check its effectiveness.

Ongoing Remedial Investigation activities:

**Last week**

Onsite:

- Continued installation of the vapor extraction system vacuum unit on the Wyle property.

Offsite:

- No work conducted.

**Sampling planned for this week**

Onsite:

- Continue installation and anticipated startup of the vacuum unit on the Wyle property.

Offsite:

- Check HVAC (heating, ventilation, and air conditioning) system operation and air exchange rate at 2281 Golden West Lane.
- Begin indoor air re-sampling at Norco High, Norco Elementary, and Norco Intermediate schools. Sampling is being redone to have representative sampling over two seasons.

**PUBLIC PARTICIPATION**

- No change from last week's update.
