Department of Toxic Substances Control (DTSC) Project Status Update for Former Wyle Laboratories Norco Facility Site August 11, 2008

Status of significant activities

- DTSC approved the Remedial Investigation Report (RI) last week. The purpose of the RI report is to present vertical and lateral extent of contamination and update conceptual site hydrogeological model of the site and the vicinity. The RI provides comprehensive evaluation of the sampling data collected from March 2005 through October 2007. The RI also includes the results presented in the Remedial Investigation, Bedrock Study, dated May 18, 2006 and the Revised Interim Remedial Investigation Report, dated April 20, 2007. These reports were previously approved by DTSC on October 10, 2006 and August 6, 2007 respectively. The RI is available for review in the repositories and will be uploaded on the DTSC envirostor database.
- Continued reviewing the Draft Feasibility Study and plans to provide comments by the end of August;

Activities completed last week

Onsite:

- Continued operations of HCS; Conducted routine operations and maintenance (O&M) for HCS;
- Conducted O&M activities for soil vapor extraction system;

Offsite:

- Completed vapor sampling at 2281 Golden west Lane home;

Former Wyle Laboratories Norco Facility Site
