

PUBLIC NOTICE FIVE-YEAR REVIEW

EBMUD WEST END PROPERTY (AKA HEROIC WAR DEAD UNITED STATES ARMY RESERVE CENTER) OAKLAND, CALIFORNIA APRIL 2012

The California Department of Toxic Substances Control (DTSC) is informing the community that we will be conducting a Five-Year Review for the EBMUD West End Property to review the current remedy for contaminated soil and groundwater. The West End Property is located at 2400 Engineers Road in an industrial area on the west side of the City of Oakland, California. It was purchased by EBMUD in 2007. The site is bordered on the north by the eastbound lanes of Interstate Highway 80 (I-80), to the south by Engineers Road, to the west by the former Oakland Army Base, and to the east by the EBMUD Main Wastewater Treatment Plant (MWWTP).

The purpose of a Five-Year Review is to evaluate the performance of previously approved and implemented cleanup activities to ensure they remain protective of human health and the environment. If a remedy is found to be performing below expectations, DTSC will recommend improvements as part of the Five-Year Review. This Five-Year Review is being conducted to meet the statutory requirements under CERCLA §121(c).

Remedial activities were completed at the site in June 2007. These activities included excavation and offsite disposal of contaminated soil, construction of an engineered asphalt cap over a portion of the property with lead-impacted soil that remained in place, and implementing Institutional Controls to reduce the potential for exposure. On-going cleanup activities include groundwater monitoring and inspection.

DTSC encourages the public to be informed on projects that affect their community. Project related materials and documents are available for public review at the following information repositories:
