HOW TO OBTAIN CENSUS DATA

Information on the Census Bureau's Census Tract Resources is available at
http://www.census.gov/geo/www/tractez.html. Census tract numbers and poverty data
from the 1990 census can be found from a street address using the following resources:

1.   Census maps and poverty tables may be reviewed at a State Data Center* or
        perhaps a local library. Maps may be purchased from the Census Bureau: (301)
        763-4636. 3'x4' maps are $5 per sheet ($25.00 minimum order). Several maps
        make up a country.

2.   Internet service from the Federal Institutions Examination Council (FFIEC). This
        will return a census tract number from an address, also median income levels.
        On the Internet: http://www.ffiec.gov/geocode/default.htm.

3.   Poverty Lookup Tables for poverty rates in Tracts with 20% or more poor for
        California. This is available on the Internet at:
        http://www.census.gov/housing/tracts/ and then click on "Californ.txt".

*STATE DATA CENTERS

State Census Data Center - Department of Finance
