

# Public Notice

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances through the restoration of contaminated resources, enforcement, regulation and pollution prevention.

## You may comment on Proposed Remedy for groundwater at the DuPont Oakley site

The Department of Toxic Substances Control (DTSC) invites you to review and comment on a proposed cleanup for the E.I. duPont de Nemours and Company (DuPont) former facility located at 6000 Bridgehead Road, Oakley, California, 94561. The cleanup proposes to improve groundwater quality in the Plume 3 area of the site. This area is over 2000 feet east of the gate on Bridgehead Road. The former DuPont plant manufactured various chemical products from 1956 to 1997. These former manufacturing facilities have been removed from the site.

**The public comment period begins October 26, 2012, and ends December 10, 2012.** You may send all public comments in writing to Peter Ruttan, Project Manager, DTSC, 8800 Cal Center Drive, Sacramento, CA 95826 or by e-mail to Peter.Ruttan@dtsc.ca.gov. Comments must be postmarked or delivered by December 10, 2012.

Under the California Environmental Quality Act, DTSC must determine whether the proposed actions may have negative effects on the environment. Based on an initial study, DTSC has concluded that the proposed actions will not have a negative impact on the environment. Therefore, DTSC has prepared a draft Negative Declaration.
