SUBMISSION OF QUARTERLY REPORT; Consent Order Item B-1.6

Dear Mr. Brausch,

The following quarterly report for 2017 Q1 outlines the Thermostat Recycling Corporation's (TRC) most recent outreach and pilot project activities. By this submission, S. Groner Associates, Inc. (SGA) is fulfilling obligations on behalf of the 25 signatories of the Consent Order listed below. If you have any questions regarding this submission, please feel free to contact me at (562) 597-0205 or the address below.

Regards,

Stephen Groner
President, S. Groner Associates, Inc.
100 W. Broadway, Suite 290
Long Beach, CA 90802

Introduction:

During the first quarter (January – March, 2017) S. Groner Associates’ (SGA) working on behalf of the Thermostat Recycling Corporation (TRC) focused on implementing the following tasks from the DTSC-approved Outreach Plan and Pilot Plan as a part of the California TRC Program. The following report outlines those efforts undertaken during this quarter broken into audiences.

Summary of Results:

Mercury-Added Thermostats Collected this Quarter: 5,239
New Collection Bin Placed this Quarter: 40

1. Mercury-Added Thermostats Collected this Quarter: 5,239
2. Mercury-Added Thermostats Collected this Year: 5,239
3. Program Element/Participants to which the Collected Thermostats are Attributed: Information not attributed due to overlapping tactical elements
4. Contractor State License Numbers: Included in appendix
5. Number and location (by street address) of collection bins: Included in appendix

Outreach Program

Summary Overview of Outreach Data

# of Participant with Bin in Program (Cumulative)					
Audience	1Q 2016	2Q 2016	3Q 2016	4Q 2016	1Q 2017
Contractors	71	71	77	104	110

HVAC Contractors

Outreach Emails

SGA started an email campaign to encourage eligible HVAC contractors to order a bin for the collection of mercury thermostats (this follows last quarter where direct phone calls were used as the communications tactic). A total of 790 HVAC contractor emails were purchased and used as the target audience for the campaign. The email was sent on 3/30/2017 in collaboration with Hoover’s email marketing service. The monetary incentive was used as the primary motivator in the email copy; subsequent emails will test different motivators and rely on the email tracking rates to determine which message is more effective. For the 3/30 email send out, the list was split in half to test whether a long or short online sign-up form was more effective in garnering sign ups.

In the fourth quarter of 2016, phone calls were the primary outreach vehicle for bin placements. Emails and an emphasis on online sign-ups offers a supplemental outreach strategy that may appeal to some contractors who are unavailable or unwilling to engage over the phone. Furthermore, emails inherently offer concrete data (e.g., open rates, clicks, unsubscribe), which is ideal in assessing the effectiveness of this tactic.

Results:

Email Tracking Rates	HVAC Email (3/30/17)	Hoovers Industry Standard
Emails sent	790	N/A
Open rate (A measure of how many people on an email list open a particular email campaign)	15.1% (119)	5-8%
Click through rate (The ratio of users who click on a specific link to the number of total users who opened the email)	26.9% (32)	5-8%

Unsubscribes (The number of people who cancelled receiving further communications from TRC)	0	1-2%
Online sign ups	4	N/A

Landing Page Maintenance

The website recyclethermostats.org is geared towards contractors (HVAC, general, demolition contractors, etc.). The homepage and online order form pages were modified to more prominently include the monetary incentive since this proved to be one of the motivators that engaged some contractors during the outreach phone calls. In addition, two online sign-up forms were created--a long version which included all of the information needed to order a bin and a short version which only included the contact's name, phone number, and email (the rest of the relevant information for the short form orders were obtained through a follow-up phone call). Lastly, a California-specific FAQ page was added with questions such as "How do I know if I'm eligible for a bin?"

The website was updated in preparation for the email campaign. In order for the email campaign to be effective it the user flow needs to be as seamless and intuitive as possible. Once a user opens the email and lands on the landing page the components and ease of use of the landing page determines whether a user will "convert" to a sign-up. The online order forms were modified to determine whether length would be a deterrent in online sign-ups and the FAQ page served as way to answer questions visitors may have had before they placed their bin order.

Short v. Long Online Signup Form

The short version performed better with a conversion rate of 6.9% (two sign-ups out of 29 views) compared to the long form's conversion rate of 2.5% (two sign ups out of 80 views). However, note that the data sample is small, especially the total number of sign-up.

FAQ Page

The page was clicked on by approximately 10% of the people that landed on the forms which indicates that more information is not necessarily a motivator for signups.

Article Placement

Five HVAC contractor trade associations were contacted during the first quarter to place newsletter articles designed to provide their subscribers with information about the Program and direct them to TRC's landing page, which allows visitors to sign up for a free collection bin. The articles contain bit.ly links that allow TRC to track the number of hits articles receive once published and as a result provide a clearer picture of how many readers are reached with our message.

Articles were written to provide information about TRC's collection program as well as to motivate HVAC contractors to sign up for a free collection bin. The articles include links that allow HVAC contractors to

sign up for a free collection bin, search for a collection site location, and learn more about the Program through a FAQ webpage.

Results:

- HVAC Contractor Trade Associations Contacted: 5
- Articles Distributed: no new articles distributed during the quarter

Outreach Calls

During this quarter, the primary tactics was shifted to email outreach, however, some additional calls and follow up were made to HVAC contractors (the group that had the highest number of bin placements). 63 HVAC contractors were contacted via phone, in an effort to place collection bins to increase access and thermostat collection totals. In addition, contractors were offered \$100 for the return of a full box of 40 mercury thermostats (prorated at \$2.50 for more or less than 40) to promote engagement in the Program.

Results:

- HVAC Contractors Called: 63
- Bins Placed: 4

Demo/Environmental Contractors

Outreach Emails

A total of 139 demolition contractor emails were purchased and used as the target audience for the campaign. The email campaign described in the HVAC contractors section was customized with fields for business and contact name to make it suitable for demolition contractors.

Results:

Email Tracking Rates	Demolition Contractor Email (3/30/17)	Hoovers Industry Standard
Emails sent	139	N/A
Open rate (A measure of how many people on an email list open a particular email campaign)	10.8% (15)	5-8%
Click through rate (The ratio of users who click on a specific link to the number of total users who opened the email)	0% (0)	5-8%
Unsubscribes (The number of people who cancelled receiving further communications from TRC)	0.7% (1)	1-2%
Online sign ups	0	N/A

Article Placement

Four demolition contractor trade associations were contacted during the first quarter to place newsletter articles designed to provide their subscribers with information about the Program and direct them to TRC's landing page, which allows visitors to sign up for a free collection bin. The articles contain bit.ly links that allow TRC to track the number of hits e-newsletter articles generate and as a result provide a clearer picture of whether or not a message is performing well.

Articles were written to provide information about TRC's collection program as well as to motivate demolition contractors to sign up for a free collection bin. The articles include links that allow demolition contractors to sign up for a free collection bin, search for a collection site location, and learn more about the Program through a FAQ webpage.

Results:

- Demolition Contractor Trade Associations Contacted: 4
- Articles Distributed: no new articles distributed during the quarter

Outreach Coordination

During this quarter, the primary tactics was shifted to email outreach, however, some additional calls and follow up were made to demolition contractors (this group had the lowest number of bin placements - still at zero). 161 demolition contractors were contacted via phone, in an effort to place collection bins in order to increase program access, increasing TRC's mercury thermostat collection totals. In addition, contractors were offered \$100 for the return of a full box of 40 mercury thermostats (prorated at \$2.50 for more or less than 40) to promote engagement in the Program.

Results:

- Demolition Contractors Called: 161
- Bins Placed: 0

General Contractors

Outreach Emails

A total of 970 general contractor emails were purchased and used as the target audience for the campaign. The email campaign described in the HVAC contractors section was customized with fields for business and contact name to make it suitable for general contractors.

Results:

Email Tracking Rates	General Contractor Email (3/30/17)	Hoovers Industry Standard
Emails sent	970	N/A
Open rate (A measure of how many people on an email list open (or view) a particular email campaign)	6.6% (64)	5-8%
Click through rate (The ratio of users who click on a specific link to the number of total users who opened the email)	12.5% (8)	5-8%
Unsubscribes (The number of people who cancelled receiving further communications from TRC)	0.7% (7)	1-2%
Online sign ups	0	N/A

Article Placement

Twenty-five general contractor trade associations were contacted during the first quarter to place newsletter articles designed to provide their subscribers with information about the Program and direct them to TRC’s landing page, which allows visitors to sign up for a free collection bin. Also, the articles contain bit.ly links that allow TRC to track the number of hits e-newsletter articles generate and as a result provide a clearer picture of whether or not a message is performing well.

Articles were written to provide information about TRC’s collection program as well as to motivate general contractors to sign up for a free collection bin. The articles include links that allow general contractors to sign up for a free collection bin, search for a collection site location, and learn more about the Program through a FAQ webpage.

Results:

- General Contractor Trade Associations Contacted: 25
- Articles Distributed: no new articles distributed during the quarter

Outreach Phone Calls

126 general contractors were contacted via phone, to seek the placement of collection bins in order increase program access, which will increase TRC’s mercury thermostat collection totals. In addition, contractors were offered \$100 for the return of a full box of 40 mercury thermostats (prorated at \$2.50 for more or less than 40) to promote engagement in the Program.

Results:

- General Contractors Called: 126
- Bins Placed: 0

Household Hazardous Waste

HHW Outreach

All HHW facilities in CA accept mercury thermostats regardless of whether or not they have a TRC bin. However, only thermostats in TRC bins are counted towards its total thermostats collected number. Residents are accustomed to taking their hazardous waste to these HHW centers and in turning to HHWs for information about what is considered hazardous. HHW centers are managed at the County level and in some cases, a large city (like Los Angeles) operates its own centers. Because of this, all of the centers vary in regards to the sophistication of their outreach efforts to the public. For example, some centers may have a full-blown social media presence with Facebook and Twitter pages while other centers may only have a PDF flyer available online. As part of the engagement of these programs, there are two primary actions HHW programs can take: (1) host a TRC collection bin at their facility (2) help to increase awareness of mercury thermostat recycling among their customers. During the months of January to March of 2017, we have focused on the second of these actions achieving the following results:

1. Partnered with 5 HHWs to post information about TRC's collection program to their residents;
2. Corresponded with HHWs program managers in San Francisco, San Diego, Santa Clara, San Bernardino, and Del Norte to discuss ways in which TRC could partner with them to disseminate information to residents more easily through retail partnerships, online promotion, and in-facility flyers;
3. Created customized electronic materials (i.e. flyers, social media posts, press releases) for HHW managers to disseminate to residents;

HHW Yahoo Group Posting

To reach out at a broader level, outreach was also conducted online via the California Household Hazardous Waste Information Exchange (hosted on the Yahoo Group Forum). Forum consists of 743 members and is specifically developed for municipal HHW programs in California and professionals in the HHW industry. Two separate posts were made from January through March.

Online Forum Post #1 - HHW Information Exchange (Yahoo Group):

From: hhwie@yahoogroups.com [mailto:hhwie@yahoogroups.com] On Behalf Of sgroner@... [hhwie]

Sent: Tuesday, February 07, 2017 2:04 PM

To: hhwie@yahoogroups.com

Subject: [hhwie] Incentives for Mercury Thermostats Collection (in California)

\$100 incentives for Contractors. There are now incentives for all contractors to collect mercury thermostats (in California).

As a part of the DTSC approved outreach program, new incentives are in place to help facilitate the collection of mercury thermostats from contractors that are most likely to remove thermostats from old homes or buildings in California.

Incentives:

1. *Free Collection Bins and Free Shipping.* TRC used to provide these bins at a cost of \$25 each, now through a new statewide effort, these bins are free to all contractors.

2. *\$100 per full Bin returned (minimum 40 thermostats - prorated if less than 40).*

Also, if you run an HHW program or a universal waste collection program you can also receive a Collection Bin for free (\$25 cost waived).

To sign up for a bin go to <http://recyclethermostats.org/>

(Note, we are also piloting collection programs with retailers. Any interested retailers can also become part of the program and receive a free bin and set up materials).

If you have any questions please feel free to contact me at (562) 597-0205 or sgroner@sga-inc.net.

Stephen Groner

Online Forum Post #2 - HHW Information Exchange (Yahoo Group):

Small Pails for Hg Thermostat Collection Now Available Mar 6

The Thermostat Recycling Corporation has made a new 1-gallon collection pail available for use, based on feedback from HHW programs and contractors.

There is limited supply of pails available right now free to contractors in California. Also, contractors still have a collection incentive of \$100 for 40 Hg Thermostats (or \$2.50 per thermostat).

Please promote in your jurisdiction to help get the word out to contractors. If you have any questions regarding the program, please feel free to contact me at (562) 597-0205 or sgroner@sga-inc.net.

Stephen Groner

HHW Information Exchange Meetings

In addition, SGA attended both the northern California HHW Information Exchange meeting in San Francisco and the Southern California HHW Information Exchange meeting in Burbank. At both meetings information regarding the TRC outreach and collection efforts was provided to attendees.

Stephen Groner discussing the rollout of the approved Outreach and Pilot Plans for Phase I at the HHW Information Exchange meeting in Burbank.

Retailers

To date, retailers have been a very small component of the mercury thermostat takeback recycling efforts (TRC received 0 thermostats from retail partners in 2015). In an effort to increase the collection of mercury thermostats throughout the state and provide a more accessible and public facing recycling site to consumers, we have targeted thermostat-carrying hardware stores throughout California as new collection site partners. Through conducting a total of 212 phone calls, we have secured 33 new retail partners as TRC collection sites. We also used these calls to learn more about potential barriers to program participation and have listed the most frequently stated barriers from retail managers below:

Results:

1. Total Retailers Contacted: 212
2. Retailers Requested Bin: 33
3. Acceptance rate: 16%
4. 22 new retail partnerships during January-March
5. Addressed space issue by creating 1-gallon pail that is easier to store in small retail locations
6. Created TRC Retail Toolkit (see appendix) and distributed to pilot partners, which includes:
 1. Shelf talker to indicate to customers that the location accepts mercury thermostats to be placed in thermostat aisle;
 2. FAQ sheet on how to identify a mercury thermostat and how to safely ship and store container;
 3. Letter from TRC to managers explaining the recycling program and their role in it;

Top Barriers:

1. Currently not selling enough thermostats
2. Floor space for smaller stores
3. Concern for the liability of mercury

Top Motivators:

1. Eliminating retail sign-up form
2. Emphasizing free-of-cost immediately
3. Testimonials from other retail managers
4. Recognition as green business

Pilot Program

Outreach Messaging Pilot

While various mercury thermostat pilot programs in other states have tested the use of financial incentives to spur increased collection rates, little data existed on how nonmonetary incentives and messaging strategies can contribute to TRC’s goals. Although the role of nonmonetary incentives may be perceived as less important or urgent as financial incentives because they can seem more subjective and difficult to track, we know that long term shifts in sustainable behavior require changing people’s minds and perceived social norms through effective outreach and messaging.

Using A/B split testing to assess the reception of different messages devised to promote proper recycling habits and reduce illegal disposal among Californian residents, we have been able develop a better understanding of what messages stick in our audiences’ minds and motivate them to action.

Understanding what messages motivate California residents to recycle their mercury thermostats will enable TRC to maximize its impact with a finite budget by strategically tailoring its outreach strategy and messaging to prompt new public perceptions and norms around improper mercury thermostat disposal.

During the pilot A/B test messaging campaigns run through Google and Facebook ads during January to March of 2017, we found that the ads focused on safety (“Protect your family. Find a free recycling center near you.”) were most effective in capturing consumers’ attention (impressions) and in driving consumers to click on the ad.

Retail Pilot Program

In the one-year pilot program we will test immediate monetary incentives in nine retailers throughout the state of California. With this pilot we aim to provide conclusive data on the most effective incentive dollar amount per recycled mercury thermostat. During the first quarter of 2017, we finalized partnerships agreements with nine hardware stores to begin the year-long pilot program to provide financial incentives in the form of immediate in-store credit for consumers and contractors.

Turn in your mercury thermostat today and receive

\$5 in-store credit*

*Please see an employee for details

Entrega su termostato de mercurio ahora y reciba

TRC Retail Pilot Cards left at register at in thermostat aisle

The following results were achieved by TRC in the first quarter of 2017 to initiate and maintain a robust Retail Collection Pilot that: engages participating retailers, increases overall collection rates, and provides conclusive evidence on what the appropriate financial incentive amount should be for TRC's California program:

1. Finalize partnerships with 12 hardware stores and received signed agreements for year long participation in program;
2. Created coupon templates for retailers to provide for customers in exchange for recycling a mercury thermostat;
3. Conducted in-store trainings with retail partner store managers;
4. Provided TRC Retail Toolkit with partners (i.e. shelf-talker, information about how identify and properly dispose mercury thermostats, and collection logs to keep track of how customers found out about the program (see appendix));

While we attempted to kick off the retail pilot program by January 1, 2017, we were unable to recruit nine stores across the state until the end of February. This means that we were unable to collect meaningful data on collection rates per incentive amount for this quarter. This information will be collected and shared in the next quarterly report. Through a quarterly check in call, we were able to receive qualitative data regarding store managers perceived barriers and motivators to participating in the program.

Top Barriers:

1. Thermostat sales are low in hardware stores so extra work of being a pilot partner will yield little financial benefit for stores;
2. General lack of awareness of importance of mercury thermostat recycling among employees and customers;
3. Concerns about safe storage of green bin with hazardous materials;
4. Incentive is misaligned--\$5-\$10 is not a significant motivator; rather the message should focus on protecting your home and family from toxicity rather than making a few bucks;
5. Thermostat sales vary greatly depending on seasonal changes;
6. Recruitment of nine retail stores to participate in pilot program due to lack of testimonials, low thermostat sale, and additional hassle that took time away from other duties;

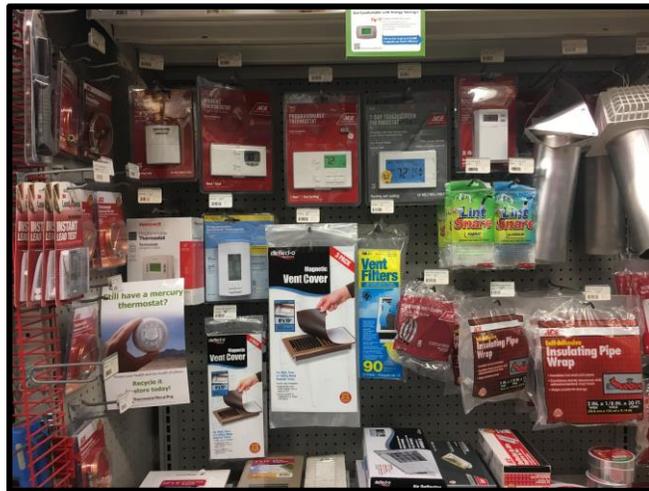

Top Motivators:

1. Recognition for being a green business;
2. Testimonials from other retail stores that can be shared with interested retail partners;
3. Public relations featuring through TRC marketing;
4. Pre-made retail toolkit with information store manager can easily disseminate to employees, in-store coupons pre-made to distribute to customers, and in-store signage to communicate the program to customers;

Household Hazardous Waste Pilot Program

In the first quarter of 2017, TRC initiated a one-year pilot with three HHW country programs across the State of California--San Bernardino County (South), Santa Clara County (Central), and Del Norte County (North)--to measure the effectiveness of a \$10 mail-in-rebate incentive to drive residents to recycle mercury thermostats. This is in response to the October 7, 2016 Approval with Modification Letter from DTSC:

2. **TRC is to implement a pilot project that provides a \$10 per thermostat incentive payment (using either a mail-in rebate or gift card) to anyone who turns in thermostats at household hazardous waste collection facilities. This type of pilot project was proposed in TRC's May 10, 2016 draft Pilot Programs Plan but removed from its August 8, 2016 submittal.**

During the first quarter of 2017, TRC worked with the participating HHW program managers to explain the program and provided tailored materials for them to disseminate to their residents (including a sandwich board sign for drop-off centers, flyers to handout and events, electronic posts for social media and their county website, and press releases to share with residents). Out of all the target audiences, HHW program managers have been particularly supportive in TRC's program goals as it aligns with their goal of effectively collecting hazardous waste from residents. However, one potential challenge for TRC is that the county programs each have different outreach methods to communicating with their residents. Furthermore, in the first quarterly check-in call at the end of March, one program manager shared that the delayed mail-in-rebate could reflect poorly on the HHW center itself and result in negative resident survey reviews, which is an important feedback mechanism for the center. Another program manager shared that the \$10 incentive is not enough to drive residents to recycle, and that a more effective approach would be to educate residents about the dangerous threat old mercury thermostats posed and work with the HHW centers to provide residents a programmable replacement for bringing in their mercury thermostat. Quantitative results of this program will be provided in the next quarterly report.

Wholesaler Pilot Program

In the first quarter of 2017, TRC initiated a one-year pilot with 12 wholesalers across the State to measure the effectiveness of monetary incentives on wholesalers' return rates. This is in response to the

October 7, 2016 Approval with Modification Letter from DTSC:

- 3. TRC is to implement a pilot project that provides \$100 mail-in rebate for each bin returned by wholesalers that contain 40 or more thermostats, and for bins with less than 40 thermostats, a pro-rated amount of \$2.50 for each thermostat in the returned bin. Although a pilot project of this type was not included in the May 10, 2016 or the August 8, 2016 pilot project plans, DTSC notes that the return rate for wholesaler return of collection bins has remained around 55%. A return rate this low, in the primary participant group that has been the focus of TRC's program, is troubling, and it is important for TRC to explore methods to improve the collections in these bins, and the rate of their return.**

We selected and partnered with 12 current wholesaler collection sites for the pilot program and used quota sampling to ensure that participating wholesalers met the following criteria:

1. Had a combined, baseline return rate of 55% (for a representative sample)
2. At least 4 who have been in the program for more than 2 years
3. At least 3 returned more than 3 bins in the past year
4. At least 4 located in Northern California
5. At least 4 located in Southern California

We sent each participating manager a packet with instructions on how to file the new wholesaler invoice form (see appendix) to receive their check rebate after returning their TRC bin and 25 forms to send in with their bins.

Letter sent to Wholesale Managers

Hello!

Thank you for agreeing to participate in Thermostat Recycling Corporation's (TRC) Wholesaler Incentive Program. For each bin returned with 40 or more thermostats, we will provide a \$100 reimbursement, or \$2.50 per thermostat if the bin contains fewer than 40 thermostats. This incentive program will last until December 31, 2017.

During this year, I will be contacting you once a quarter to follow up with the program. Feel free to contact me with any questions you may have, at this email: ksingh@sga-inc.net or by calling me at 732-485-4589.

Attached you will find the Invoice Form necessary to obtain the reimbursement. These will also be sent to your store's location by mail. Please read the attached instructions, which detail how to properly submit the form to TRC.

Again, thank you for your participation!

Sincerely,

Kendra

Results:

Quantitative findings will be provided in the next quarterly report, however initial qualitative check in calls revealed that the financial incentive animated wholesale managers and employees to more strongly encourage contractors to recycle their mercury thermostats in the beginnings months of the new pilot program.

Hello [-FirstName-],

As a [Primary_Industry] with at least seven employees or located within a rural area, you are eligible to receive \$2.50 for each mercury thermostat you recycle. In order to be eligible for the incentive, you must have a designated thermostat recycling bin. Our records indicate that [-CompanyName-] does not currently have a bin, but the good news is that these recycling bins are complimentary for California businesses.

Why Order a Bin?

- (1) **Earn \$200** each time you return 80 mercury thermostats.
- (2) **No cost to you!** We cover all expenses, including materials and shipping.
- (3) **Protect the safety of others** by keeping toxic mercury out of the environment.

No Obligations or Commitments!

[Order Your Bin Today](#)

Who is Sponsoring the Program?

The California Department of Toxic Substances Control oversees the program and the Thermostat Recycling Corporation (a non-profit organization funded by the thermostat manufacturers) implements the program in an effort to capture all unwanted mercury thermostats.

Earn money for recycling unwanted thermostats! Order your bin or get more information at recyclethermostats.org/request or call 562.597.0205 for more information.

Website FAQ page:

Frequently Asked Questions for California Contractors

Q. How do I order a bin?

A. You can order your free bin with our easy online sign-up form or by calling us at 562-597-0205.

Q. How do I know if I'm eligible for a bin?

A. Any independent business that comes into contact with mercury thermostats and that has 7 or more service technicians, or services a rural area, is eligible to directly participate in the program. Only businesses based in California are eligible to receive \$2.50 for each recycled thermostat.

Q. How large is the bin?

A. There are two bin sizes so that you can select the one that best suits the needs of your business. The large, rectangular bin is 22" long by 13" wide by 13" tall and fits approximately 100 thermostats. The small, 1-gallon pail is 8" wide by 7" tall and fits approximately 15 thermostats.

Q. Do I need to fill up the bin before I can return it?

A. No, you can send the bin back at any time. We do recommend that you return the bin as soon as it is full, or at a minimum of once per year.

Q. What does it cost?

A. There is no cost for eligible California-based contractors to order a bin to recycle mercury thermostats. All of the shipping and materials expenses are paid for by the Thermostat Recycling Corporation. In fact, contractors in California are eligible to receive \$2.50 for each recycled mercury thermostat.

Q. How much can I earn?

A. If you are based in California and sign up to receive a bin from the Thermostat Recycling Corporation, you are eligible to earn \$2.50 for each mercury thermostat you collect and return. There is no limit on how many times you can return your bin for recycling and on how many mercury thermostats you can recycle for the cash incentive.

Q. Do I have to participate in the program?

A. No. Participation is voluntary. Keep in mind, however, that it is illegal to dispose of a mercury thermostat in solid waste in California.

Preparing TRC Collection Containers for Shipment

When your collection container is full, or when it has been one year since at least one mercury thermostat has been sitting in it, please use the following steps to prepare your container for shipping:

1. Check to make sure the items in the collection container are **mercury-containing thermostats only**. Remove any unacceptable items. If you find anything besides whole mercury thermostats, please contact TRC for special shipping instructions. Never accept jars or any other containers of liquid mercury as those are hazardous waste and cannot be shipped in our bins.

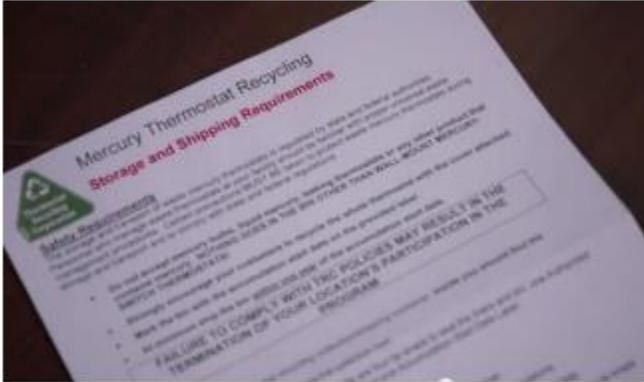

UNACCEPTABLE ITEMS

2. Enclose the thermostats in the liner, use the provided nylon tie to tie the liner, close the bin and secure it by using the remaining nylon ties on the two ends of the lid.

3. Review the instructions that came with your bin prior to closing the collection tub in preparation for shipping. It is very important to neatly write your return address on the pre-paid shipping label, and use indelible ink if possible.

4. Attach the shipping label and call the shipping company whose phone number is listed on the label to schedule a pick-up. Make sure to get a tracking number from the driver at pick-up to help TRC track the shipment if an issue occurs.

thermostat-recycle.org | 1-888-266-0550 | trc@thermostat-recycle.org

Does my thermostat contain mercury?

If the thermostat uses a dial or lever, odds are it contains mercury and needs to be recycled. Containing between 3 and 12 grams mercury, thermostats are likely the device in homes that have the most mercury today.

Examples of mercury thermostats:

Look for the mercury switch inside.

If so, it needs to be recycled. It's the law.*

California Retail Pilot Program

Dear Retail Pilot Partner:

Thank you for participating in the Thermostat Recycling Corporation's (TRC) Retail Pilot Program. As a Retail Pilot Partner, you will be provided with a green bin to collect in-tact mercury thermostats from your customers. In exchange for each mercury thermostat brought in, retailers will provide customers with an immediate form of in-store credit of \$5 or \$10 (depending on the store). TRC will reimburse retailers for the costs of the in-store credit and assume all costs of shipping the bins for proper disposal.

Reimbursement Instructions

TRC bins should be shipped when the bin is full or within one year of the date the first mercury thermostat was collected. Collection sites will receive a new bin once the old bin is returned. Complete the following steps with your **three-part invoice form** to properly dispose of your mercury thermostats and receive your reimbursement check:

1. Include the **yellow** copy in the green bin with the thermostats. Use the shipping label included in your bin when it is ready to be processed.
2. Mail or email the **white** copy to TRC headquarters at 500 Office Center Drive, Suite 400, Fort Washington, PA 19034, trc@thermostat-recycle.org.
3. Retain the **pink** copy for your store records.

Once the bin is received and the mercury thermostats are accounted for, TRC will process all payment forms and administer a payment directly to the store. The bin will then return to you with new materials to begin the process again. This pilot program will last until December 31, 2017.

If you have any questions regarding this incentive program, please call us at **1-888-266-0550** or email us at trc@thermostat-recycle.org for more information.

Thank you,

HHW Pilot Instructions

1765 Duke Street | Alexandria, VA 22314 | thermostat-recycle.org

California HHW Pilot Program

Dear HHW Pilot Partner:

Thank you for participating in the Thermostat Recycling Corporation's (TRC) HHW Pilot Program. As a HHW Pilot Partner, you will be provided with a green bin to collect intact mercury thermostats from your residents, a toolkit with directions and payment forms, and promotional materials to promote this one-year pilot to your community. In exchange for each mercury thermostat brought in, you will provide residents with a payment form to fill out so that they can receive a \$10 check per mercury thermostat recycled at your facility. TRC will assume all costs of shipping the bins for proper disposal. This pilot program will last until December 31, 2017.

Reimbursement Instructions

TRC bins should be shipped when the bin is full or within one year of the date the first mercury thermostat was collected. Collection sites will receive a new bin once the old bin is returned. Please review the following steps to properly dispose of mercury thermostats and ensure your residents receive their reimbursement checks:

1. Receive mercury thermostat from resident and gently remove cover to make sure it contains mercury ampoules. Residents will not be reimbursed for non-mercury thermostats.
2. Provide resident with two-part form and plastic bag (maximum of 10 t-stats per bag). There is no limit to the number of mercury thermostats residents can be reimbursed for.
3. Include the filled-out white copy and the mercury thermostat in the plastic bag before placing into the green bin. Residents should retain the yellow copy for their records. Use the shipping label included in your bin when it is ready to be processed.
4. Once the bin is received and the mercury thermostats are accounted for, TRC will process all payment forms and administer checks directly to the residents.
5. The bin will then return to you with new materials to begin the process again.

If you have any questions regarding this incentive program, please call us at 1-888-266-0550 or email us at trc@thermostat-recycle.org for more information.

Thank you,

Ryan L. Kiscaden
Executive Director

1765 Duke Street | Alexandria, VA 22314 | thermostat-recycle.org

California Wholesaler Incentive Program

Dear Wholesale Partner:

You have been selected to participate in the Thermostat Recycling Corporation's (TRC) Wholesaler Incentive Program. As a Wholesale Incentive Partner, you will be rewarded with either \$100 for every TRC bin returned with 40+ mercury thermostats, or \$2.50/ thermostat for bins returned with fewer than 40 thermostats. TRC will assume all costs of shipping the bins for proper disposal. This program will last until December 31, 2017.

Reimbursement Instructions

1. TRC bins should be shipped when the bin is full or within one year of the date the first mercury thermostat was collected.
2. Complete the "CA WHOLESALER PILOT PROGRAM INVOICE FORM."
 - a) Include the **yellow** copy in the green bin with the thermostats.
 - b) Mail or email the **white** copy to TRC headquarters at 500 Office Center Drive, Suite 400, Fort Washington, PA 19034 or trc@thermostat-recycle.org
 - c) Retain the **pink** copy for your store records.
3. Ship the bin to TRC (mailing label included in bin) and include the yellow invoice form.
4. TRC receives the bin and issues payment to the store. NOTE: TRC will only reimburse the store for mercury thermostats; non-mercury thermostats will not be reimbursed.
5. The bin is returned to the store for the collection of additional thermostats.

If you have any questions regarding this incentive program, please call us at **1-888-266-0550** or email us at trc@thermostat-recycle.org for more information.

Thank you,

Ryan L. Kiscaden
Executive Director
