Chapter 24. Mercury Thermostat Collection and Performance Requirements

Article 1
§66274.1 Scope
§66274.2 Applicability.
§66274.3 Definitions.
§66274.4 Methodology for Determining the Number of Out-of-Service Mercury Added Thermostats Becoming Waste Annually.
§66274.5 Annual Collection Rate Performance Requirements.
§66274.6 [Reserved]
§66274.7 Identification Requirements when Delivering Mercury Thermostats to a Collection Location
§66274.8 Annual Reporting Requirements.

Add California Code of Regulations, title 22, division 4.5, chapter 24 to read:

Chapter 24. Mercury Thermostat Collection and Performance Requirements

§66274.1 Scope.

(a) This chapter establishes performance requirements that specify collection rates and a methodology for determining the number of out-of-service mercury-added thermostats becoming waste annually.
(b) A person managing out-of-service mercury-added thermostats pursuant to this chapter shall also comply with all applicable requirements of chapter 23 of this division.

§66274.2 Applicability.

Effective January 1, 2013 the requirements of this chapter shall apply to:

(a) Manufacturers as described in section 66274.3
(b) HVAC contractors as described in section 66274.3
(c) Demolition contractors as described in section 66274.3

§66274.3 Definitions.

When used in this chapter, the terms listed in this section have the meanings given below. Terms used in this chapter that are not defined in this section but are defined in chapter 10 of this division and/or in chapter 6.5 of division 20 of the Health and Safety Code have the meanings given in those sources.

“Collection Rate” means the number of out-of-service mercury-added thermostats collected, as reported by a manufacturer or group of manufacturers, divided by the calculated number of out of service mercury added thermostats becoming waste annually, determined pursuant to section 66274.4, expressed as a percentage.

“Demolition contractor” means a C-21 contractor as defined in section 832.21 of title 16 of the California Code of Regulations.

“Heating, ventilating and air-conditioning (HVAC) contractor” means a C-20 contractor as defined in section 832.20 of title 16 of the California Code of Regulations.
“Household hazardous waste collection facility (HHWCF)” has the same meaning as in subdivision (f) of section 25218.1 of the Health and Safety Code.

“Incentive,” as used in subsection (g) of section 25214.8.13 of the Health and Safety Code, means a cash payment or provision of a coupon, discount, or rebate to a service technician, homeowner, or contractor for each out-of-service mercury-added thermostat returned to a manufacturer-sponsored thermostat collection location with manufacturer-provided thermostat collection bins.

“Manufacturer” has the same meaning as in subdivision (a) of section 25214.8.11 of the Health and Safety Code.

“Mercury-added thermostat” has the same meaning as in subdivision (b) of section 25214.8.11 of the Health and Safety Code.

“Out-of-service mercury-added thermostat” has the same meaning as in subdivision (c) of section 25214.8.11 of the Health and Safety Code.

“Program” has the same meaning as in subdivision (d) of section 25214.8.11 of the Health and Safety Code.

“Retailer” has the same meaning as in subdivision (e) of section 25214.8.11 of the Health and Safety Code.

“Thermostat” has the same meaning as in subdivision (f) of section 25214.8.11 of the Health and Safety Code.

“Thermostat collection location” means a location that accepts out-of-service mercury-added thermostats for recycling pursuant to the requirements in article 3 of
“thermostat collection location” includes, but is not limited to, a wholesaler or retailer that collects thermostats pursuant to section 25214.8.14 of the Health and Safety Code.

“TP” means the annual collection rate performance requirement for out-of-service mercury-added thermostats, determined pursuant to section 66274.5.

“TT” means the total number of out-of-service mercury-added thermostats becoming waste in a given calendar year, determined pursuant to the methodology described in section 66274.4.

“Wholesaler” has the same meaning as in subdivision (g) of section 25214.8.11 of the Health and Safety Code.

§66274.4 Methodology for Determining the Number of Out-of-Service Mercury Added Thermostats Becoming Waste Annually.

(a) The number of out-of-service mercury-added thermostats becoming waste in a calendar year (TT) shall be determined as follows. For a given calendar year, the number of out-of-service mercury-added thermostats becoming waste shall be the annual flow specified in the “Low Estimate” column of Table 1.5 of the SERA report for that year (beginning with “year 4” for 2013).

(b) The table below specifies the number of out-of-service mercury-added thermostats becoming waste each year (TT), calculated pursuant to subsection (a):
A manufacturer or group of manufacturers may submit to the department additional data on the number of mercury-added thermostats estimated to remain in use in California and the number of these thermostats that will become waste in each year. Any submittal by a manufacturer or group of manufacturers pursuant to this subsection shall include all raw data, formulas, assumptions, models and calculations used, sufficient to allow the department to replicate the manufacturer’s or group of manufacturer’s calculations.

(d) The department shall consider any data submitted by a manufacturer or group of manufacturers pursuant to subsection (c) and may adjust the estimated number of thermostats becoming waste annually (TT) specified in this section if the department determines that the data supports such an adjustment.

§66274.5 Annual Collection Rate Performance Requirements.

Beginning with calendar year 2013, a manufacturer or group of manufacturers shall meet or exceed the collection rate performance requirement (TP) specified in subsection (a) for that year.

(a) The table below specifies the collection rate performance requirement (TP) as a percentage of out-of-service mercury-added thermostats becoming waste annually (column C) and as a number of out-of-service mercury-added thermostats (column D).

<table>
<thead>
<tr>
<th>A. Year</th>
<th>B. TT, determined pursuant to §66274.4</th>
<th>C. Performance requirement (TP), expressed as a percentage of TT</th>
<th>D. Performance requirement (TP), expressed as a number of thermostats (=B x C)</th>
</tr>

(2) The department may adopt regulations updating the performance requirements for 2018 and subsequent years. Unless and until the department adopts such regulations, the collection rate performance requirement (TP) shall be 75 percent of TT in 2018 and in subsequent years shall remain 75 percent of the number of out-of-service mercury-added thermostats becoming waste each year (TT), as calculated pursuant to subsection section 66274.4(b).

(b) If more than one manufacturer or group of manufacturers operates a program in a given calendar year:

(1) Based on information in the annual reports submitted pursuant to subsection (a) of section 66274.7 by all programs in prior years, the department shall assign a pro
rata proportion of TT to each manufacturer or group of manufacturers operating a program.

(2) Each program’s performance requirement shall be determined pursuant to subsection (a) except that the program’s collection rate goal shall be calculated using the program’s pro rata proportion of TT determined by the department pursuant to paragraph (1).

(3) Any manufacturer or group of manufactures wishing to dispute the pro rata proportion of TT assigned to it by the department may submit data to the department in support of its position within 30 days of posting by the department on the internet Web site the percentage for each program. The department shall consider such data and may adjust the pro rata proportions of TT assigned to each program if the data supports such an adjustment. If the department makes any adjustments pursuant to this paragraph, the department shall within 60 days, update the information posted on its Internet Web site pursuant to subsection (c), as necessary.

(c) On or before May 1, 2013, and on or before May 1 of each subsequent year, the department shall post the following information on its Internet Web site regarding each program’s collection of out-of-service mercury-added thermostats during the previous calendar year:

(1) TT as determined pursuant to subsection (b) of section 66274.4 or the program’s pro rata proportion of TT determined pursuant to subsection (b) of this section, as appropriate;

(2) The total number of out-of-service mercury-added thermostats collected by the program, as determined pursuant to subsection (e) of section 66274.7;

(3) The program’s collection rate performance requirement (TP), as specified in subsection (a) or as determined pursuant to subparagraph (b)(2), as appropriate;

(4) The actual collection rate achieved by the program, expressed as a percentage of TT or the program’s pro rata proportion of TT, as appropriate; and

(5) A determination of whether or not the program achieved its performance requirement.

§66274.6 [Reserved]

§66274.7 Identification Requirements when Delivering Mercury Thermostats to a Collection Location

(a)(1)(A) Upon delivery of out-of-service mercury-added thermostats to a collection location pursuant to section 25214.8.15 of the Health and Safety Code, an HVAC contractor or an employee of an HVAC contractor shall provide the business operating the collection location with the contractor’s Contractors State Licensing Board Identification Number.

(B) Upon delivery of out-of-service mercury-added thermostats to a collection location pursuant to section 25214.8.16 of the Health and Safety Code, a demolition contractor or an employee of a demolition contractor shall provide the business operating the collection location with the contractor’s Contractors State Licensing Board Identification Number.

(2) An HVAC contractor, demolition contractor, or employee of an HVAC or demolition contractor that delivers thermostats in a plastic bag or other container, pursuant to section 66273.34 of chapter 23 of the California Code of Regulations may comply with the requirement in paragraph (1) of this subsection by printing the contractor’s Contractors State Licensing Board Identification Number on the bag or container or on a label affixed to the bag or container.

(b)(1) A person other than an HVAC contractor, demolition contractor, or employee of an HVAC or demolition contractor who delivers out-of-service mercury-added thermostats to a collection location established by a manufacturer or group of

Thermostat Regulations Text Page 8 of 11 August 7, 2012
manufacturers pursuant to section 25214.8.14 of chapter 6.5 of the Health and Safety Code, shall provide his or her name, address, and telephone number to the collection location.

(2) A person other than an HVAC contractor, demolition contractor, or employee of an HVAC or demolition contractor who delivers out-of-service mercury-added thermostats in a plastic bag or other container may comply with the requirement in paragraph (1) of this subsection by printing the information on the bag or container or on a label affixed to the bag or container.

Authority: Sections 58012, 25214.8.15, and 25150, Health and Safety Code.

§66274.8 Annual Reporting Requirements.

On or before April 1 of each calendar year, a manufacturer or group of manufacturers that operates a program shall submit an annual report to the department that shall include all of the information specified in subsection (i) of section 25214.8.13 of the Health and Safety Code and all of the following additional information for the calendar year covered by the report:

(a) A listing of all brand names of mercury-added thermostats historically produced by the manufacturer or group of manufacturers and sold in California;

(b) The additional information specified below:

(1)(A) The name, physical address, and contact phone number of each location to which collection bins were shipped by the manufacturer or group of manufacturers and

(B) The unique identification number of each bin.

(2)(A) The name, physical address, and contact phone number of each location at which out-of-service mercury-added thermostats were collected in bins provided by the manufacturer or group of manufacturers and
(B) The unique identification number of each bin.

(3)(A) The name, physical address, and contact phone number of each location from which a collection bin or bins were returned to the manufacturer or group of manufacturers, even if different from the location to which the bin or bins were originally shipped;

(B) The unique identification number of each bin; and

(C) The date or dates on which the bin or bins were received by the manufacturer or group of manufacturers.

(c) The total numbers of intact out-of-service mercury-added thermostats in all bins returned to the manufacturer or group of manufacturers during the calendar year covered by the report, specifying the number of each brand name and manufacturer;

(d) For loose ampoules returned in collection bins:

(1) The total number of loose ampoules received during the calendar year covered by the report;

(2) The estimated number of out-of-service mercury-added thermostats represented by the loose ampoules reported pursuant to subparagraph (A), which shall be calculated as follows:

(A) Using a conversion factor of two ampoules per thermostat; or

(B) Using an alternate conversion factor determined by the manufacturer or group of manufacturers.

(2) A manufacturer or group of manufacturers shall include data and calculations to support its use of an alternate conversion factor pursuant to subparagraph (B).

(e) The total number of out-of-service mercury-added thermostats collected, which shall be determined by adding the number of all brands of intact out-of-service mercury-added thermostats collected, as reported pursuant to subsection (c) and the estimated number of out-of-service mercury-added thermostats represented by loose ampoules, as reported pursuant to subsection (d).
(f) A listing of the unique identification numbers of all collection bins shipped to household hazardous waste collection facilities, retailers, and wholesalers that have not been returned to the manufacturer or group of manufacturers within 18 months of shipment, as of the date of the report, and the name, address, contact person, and telephone number of the location to which each bin was shipped.

(g) A listing of Contractors State Licensing Board Identification Numbers provided pursuant to subsection (a) of section 66274.6.

(h) A description of:

(1) Any changes to the program from the previous year and an evaluation of their effectiveness in increasing collection rates; and

(2) Any planned changes to the program to increase collection rates.

(i) A program that also implements a state-mandated out-of-service mercury-added thermostat collection program in one or more other states shall provide the following information about each such program:

(1) The name of the state;

(2) The number of out-of-service mercury-added thermostats collected in the state during the same calendar year covered by the report;

(3) A brief description of the state’s law, including any requirement for payment of an incentive to service technicians, contractors or homeowners to encourage collection;

(4) The number of collection locations for out-of-service mercury-added thermostats in the state, if known; and

(5) A description of any education and outreach and performance requirements included in the state’s law.
