

**CHAPTER 43: ADDITIONAL REQUIREMENTS FOR MANAGEMENT OF  
EXTREMELY HAZARDOUS WASTE:**

This chapter is based on Article 7 of Title 22, California Code of Regulations, (CCR), Division 4, Chapter 30, which sets forth requirements for the management of extremely hazardous waste. These are in addition to the requirements that must be complied with for the management of all hazardous wastes, including extremely hazardous wastes. The federal regulations contain no special regulatory requirements for the management of extremely hazardous waste. Therefore, incorporation of this chapter into the proposed regulations is necessary to retain the existing Title 22, CCR regulatory provisions pertaining to extremely hazardous waste. This chapter conforms to the existing, corresponding Title 22, CCR regulations, except that the regulations are being renumbered and statutory authority and reference notes are being added at the end of each regulation section to conform with standard CCR format.
