

Public Notice

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances by restoring contaminated resources, enforcing hazardous waste laws, reducing hazardous waste generation, and encouraging the manufacture of chemically safer products.

HAZARDOUS WASTE EMERGENCY PERMIT

University of Fullerton California

Fullerton, CALIFORNIA 92831

On October 5, 2018, California State University, Fullerton requested an Emergency Permit from the California Department of Toxic Substances Control (DTSC) for onsite treatment of expired chemicals at 800 North State College Boulevard, Fullerton, California 92831. The items to be treated include three chemicals: Ethyl Ether (5x1 Liter), Isoprene (1x100ml), and 2,4 Dinitrophenylhydrazine (1x25 grams); in seven containers.

Clean Harbors Environmental Services has been contracted to conduct this treatment. The chemicals are potentially reactive and unsafe for transport in their present state. The treatment involves the addition of liquid solution to the containers to stabilize the chemicals. Once the chemicals are treated, they will be transported offsite for proper management. DTSC has determined that the chemicals pose an imminent and substantial endangerment to human health and the environment if not properly managed. Therefore, an emergency permit should be issued. This Emergency Permit is effective from October 19, 2018 through December 17, 2018. The Emergency Permit includes measures to minimize any adverse impact to the community and the environment.

CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA): DTSC has determined that the project is exempt from the requirements of CEQA and has filed a Notice of Exemption (NOE) with the State Clearinghouse. The Emergency Permit, NOE, and California State University, Fullerton's request for this project are available for review at the file room located at:

DTSC Sacramento Regional Office
