

Product-Chemical Profile on Nail Products Containing Toluene – Topics for Stakeholder Input

In addition to your comments on the Product-Chemical Profile on Nail Products Containing Toluene, DTSC appreciates your answers to the questions below:

PRODUCT AND CHEMICAL DESCRIPTION (CH. 1)

1. Are the nail product definitions in the Draft Product-Chemical Profile for Nail Products Containing Toluene (“Profile”) clear and complete?
2. Are the GPC GS1 codes in the Profile relevant and comprehensive?

PRODUCT-CHEMICAL POTENTIAL EXPOSURES AND IMPACTS (CH. 2-6)

1. What specific brands and nail product types currently contain toluene and at what concentrations?
2. Are there additional exposure studies on toluene from nail products that are not included in the Profile?

ALTERNATIVES (CH. 7)

1. Please provide information on functionally acceptable alternatives to toluene in nail products and provide information on known hazards, exposure, and efficacy associated with these alternatives.
 - a. What obstacles exist to the wider adoption of these alternative chemicals?

ADDITIONAL PRODUCT-CHEMICAL COMBINATIONS

1. Are there other Candidate Chemicals (CC) or nail products DTSC should consider evaluating other than toluene in nail coatings and thinners? Please provide the references for information submitted, hazard traits, exposure information, functional uses, and safer alternatives.
