

Public Notice

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances by restoring contaminated resources, enforcing hazardous waste laws, reducing hazardous waste generation, and encouraging the manufacture of chemically safer products.

EMERGENCY PERMIT

THERMO FISHER SCIENTIFIC

6177 SUNOL BLVD.
PLEASANTON, CALIFORNIA, 94566

On May 10, 2019, Thermo Fisher Scientific (Thermo) requested an Emergency Permit from the California Department of Toxic Substances Control (DTSC) for onsite treatment of expired chemical at 6177 Sunol Blvd., Pleasanton, CA 94566. The item to be treated is 20 (twenty) Tetrahydrofuran. The chemical is potentially reactive and unsafe for transport in its present state. The treatment involves the addition of liquid solution to the containers to stabilize the chemical.

Clean Harbors Environmental Service has been contracted to conduct this treatment. Once the chemical is treated, it will be transported offsite for proper management. DTSC has determined that the chemical pose an imminent and substantial endangerment to human health and the environment if not properly managed. Therefore, an emergency permit should be issued. This Emergency Permit is effective from May 24, 2019 through July 22, 2019. The Emergency Permit includes measures to minimize any adverse impact to the community and the environment.

CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA): DTSC has determined that the project is exempt from the requirements of CEQA and has filed a Notice of Exemption (NOE) with the State Clearinghouse. The Emergency Permit, NOE, Thermo's request for this project are available for review at the file room located at:

DTSC Sacramento Regional Office
