# Annual and Fiscal Year Fee Summary

## Fee Rates for Calendar Year January 1, 2022 through June 30, 2022 Fee Rates for Fiscal Year 2022/23 (July 1, 2022 – June 30, 2023)

(Revised 03/09/2022)

The Department of Toxic Substances Control (DTSC) is the lead agency in California for hazardous waste management. DTSC enforces the state's Hazardous Waste Control laws, issues permits to hazardous waste facilities, and mitigates contaminated hazardous waste sites. This document summarizes the fees charged by DTSC. The California Department of Tax and Fee Administration (CDTFA) (formerly the State Board of Equalization (BOE)) partners with DTSC to administer and collect many of the fees described in this summary.

The purpose of this document is to conveniently summarize state law as it relates to fees charged and collected by DTSC or collected by CDTFA for DTSC. In Fiscal Year (FY) 2021/22, SB 158 (Chapter 73, Statutes of 2021) was signed into law, significantly restructuring the fees charged by DTSC. This document reflects the changes initiated by SB 158 for Calendar Year (CY) 2022 and FY 2022/23. Additional information about hazardous waste fees, and the impact of SB 158, can be found on DTSC or CDTFA's websites<sup>1</sup>. The DTSC Fee and Revenue Management Unit can be contacted directly at [Fees@dtsc.ca.gov](mailto:Fees@dtsc.ca.gov). Information can also be obtained by contacting DTSC's Regulatory Assistance Officers at (800) 728-6942 or (916) 324-2439 (out-of-state) or by email at [RAO@dtsc.ca.gov](mailto:RAO@dtsc.ca.gov).

## Activity Fee for Hazardous Waste Permit Applications and Permit Modifications

*(Health and Safety Code (H&SC) sections 25189.3, 25205.7, 25206.1 through 25206.4 and 25247(d)(3))*

Senate Bill (SB) 839 (Chapter 340, Statutes of 2016) eliminated the option for a flat-rate Activity Fee for hazardous waste facility permit application and permit modification requests submitted after April 1, 2016. SB 839 requires anyone applying for a new permit, renewal of a permit, standardized permit, or post closure permit, or requesting certain permit modifications to enter into a written agreement to reimburse DTSC for its costs incurred in processing the application or request. This requirement also applies to requests for variances and waste classification determinations.

DTSC has developed a permitting cost reimbursement policy and procedure document based on a proposed cost reimbursement agreement. DTSC has met, and will continue to meet, with each of the facilities applying for permits or requesting permit modifications to discuss the cost reimbursement policy and procedure document, cost reimbursement payment agreement, cost estimate, required advance payment, billing issues, and schedule of the permitting project. [Click here to view the permitting cost reimbursement policy and procedure document.](#)

Activity Fees for Permitting do not apply to the following (H&SC section 25205.7 (e) & (f)):

1. A variance granted pursuant to Article 4 (commencing with Section 66263.40) of Chapter 13 of Division 4.5 of Title 22 of the California Code of Regulations (CCR) (certain transportation operations).
2. A variance issued to a public agency to transport wastes for purposes of operating a household hazardous waste collection facility or to transport waste from a household hazardous waste collection facility, which receives household hazardous waste or hazardous waste from very small quantity generators pursuant to Article 10.8 (commencing with H&SC section 25218).
3. A permanent household hazardous waste collection facility.
4. A variance issued to a public agency to conduct a collection program for agricultural wastes.

## Consultative Services

*(H&SC sections 25201.9 and 25206.1 through 25206.4)*

DTSC may, upon written request by any person, enter into an agreement to provide certain consultative services to businesses who request DTSC's advice and assistance in complying with H&SC, Division 20, Chapter 6.5 (Hazardous Waste Control Law) or Chapter 6.8 (Hazardous Substance Account Act). The agreement will require the person to reimburse DTSC for its costs pursuant to H&SC sections 25206.1 through 25206.4.

Assembly Bill (AB) 181 (Chapter 797, Statutes of 2019) amended Health and Safety Code section 25205.7, subdivision (a)(2), concerning the 25% advance payment of fees pursuant to a reimbursement agreement under section 25205.7, subdivision (a)(1). AB 181 eliminated the requirement for 25% advance payment with respect to a reimbursement agreement entered into by a facility owned by a federal agency under section 25205.7, subdivision (a)(1).

## Disposal Fee

*(H&SC sections 25174.1 through 25174.7, 25205.5.1 and section 66269.2 of Title 22 CCR)*

### Impact of SB 158:

Effective July 1, 2022, SB 158 eliminates the requirement to pay a Disposal Fee. SB 158 makes H&SC sections 25174.1 through 25174.7 inoperative on July 1, 2022, and repeals these sections as of January 1, 2023. The description below reflects changes to the disposal fee applied through the June 2022 period.

Persons who dispose of hazardous waste to land at an authorized hazardous waste disposal facility in California will pay a fee directly to the disposal facility, and the disposal facility will transmit the fee to CDTFA for deposit into the Hazardous Waste Control Account (HWCA). The fees specified in Table 1, established in H&SC section 25174.6(a), are the rates for CY 2022 through June 30, 2022, and while applicable, are adjusted annually, except for the non-Resource Conservation and Recovery Act (RCRA) Cleanup Waste rate, to reflect changes in the Consumer Price Index (CPI) as determined by the Department of Industrial Relations. Disposal Fees are calculated using the total wet weight measured in tons, or fractions thereof, of the hazardous waste in the form in which the hazardous waste existed at the time of disposal, submission for disposal, or application to land using a land disposal method as defined in section 66260.10 of Title 22 CCR.

**Table 1: Land Disposal Fees for CY 2022 (January 1, 2022 – June 30, 2022)**

Due Date: Upon disposal at the disposal facility

Base Rate \$161.92

Waste Category	Rate
Non-RCRA cleanup wastes* (excluding asbestos)	\$ 5.72/ton
Other non-RCRA wastes* (including asbestos)	\$ 26.41/ton
Ores and Minerals*, Mining Waste	\$ 21.05/ton
Extremely Hazardous Waste	\$323.84/ton
Restricted Hazardous Waste	\$323.84/ton
RCRA hazardous waste, not elsewhere classified	\$ 65.42/ton
RCRA hazardous waste treated at the facility to be non-RCRA or nonhazardous	\$ 26.41/ton
RCRA hazardous waste generated in a cleanup action and treated to non-RCRA standards	\$ 5.72/ton
Incineration or dichlorination residues disposed in-state	\$ 8.10/ton
Waste disposed out-of-state, or Exempt Waste	\$ 0.00

\* Fees are paid on the first 5,000 tons per month disposed of or submitted for disposal of non-RCRA and mining waste at each onsite or offsite facility by each generator.

Land Disposal Fees do not apply through June 30, 2022, to any of the following: (H&SC section 25174.7)

1. Hazardous wastes that result when a government agency, or its contractor, removes or remedies a release of hazardous waste in the state caused by another person.
2. Hazardous wastes generated or disposed of by a public agency operating a household hazardous waste collection facility in the state pursuant to H&SC, Division 20, Chapter 6.5, Article 10.8 (commencing with section 25218) including,

but not limited to, hazardous wastes received from conditionally exempt small quantity commercial generators, authorized pursuant to section 25218.3.

3. Hazardous wastes generated or disposed of by local vector control agencies that have entered into a cooperative agreement pursuant to section 116180 or by county agricultural commissioners, if the hazardous wastes result from their control or regulatory activities and if they comply with the requirements of this chapter and regulations adopted pursuant this chapter.
4. Hazardous waste disposed of, or submitted for disposal or treatment, by any person, which is discovered and separated from solid waste as part of a load checking program.
5. Any person who acquires land for the sole purpose of owner-occupied single-family residential use, and who acquires that land without actual or constructive notice or knowledge that there is a tank containing hazardous waste on or under that property, is exempt from the fees imposed pursuant to sections 25174.1 and 25205.5, in connection with the removal of the tank.

## Environmental Fee

*(H&SC section 25205.6 and section 66269.1 of Title 22 CCR)*

### SB 158 Impact:

SB 158 revised the timing for the period of assessment of the Environmental Fee from an annual calendar year fee to an annual fiscal year fee, changed the timing that DTSC provides data to CDTFA from November 1 to October 1, and added a fee exemption for small businesses with less than 100 employees. The fee for FY 2022/23 is set in H&SC section 25205.6 at a level to generate revenues necessary to fund DTSC's level of service expected in FY 2022/23 and to begin establishing a prudent reserve. Commencing on July 1, 2023, the Board of Environmental Safety will set the annual fiscal year fee to correspond to the amount of the annual appropriation for FY 2023/24, up to a specified cap for FY 2023/24, per H&SC section 25205.6.1. Beginning with FY 2024/25, the Board may adjust the Environmental Fee for changes to the CPI as determined by the Department of Industrial Relations. The description below applies to the Environmental Fee for FY 2022/23.

On or before October 1 of each year, DTSC provides CDTFA with a schedule of codes from either the Standard Industrial Classification system maintained by the U.S. Department of Labor, or the North American Industry Classification system adopted by the U.S. Census Bureau, whichever it deems suitable, designating the classes of organizations that use, generate, store, or conduct activities in the state related to hazardous materials (activities related to hazardous materials include the use of products such as paper, ink, plastics, paint, etc., which were manufactured using hazardous materials). CDTFA assesses and collects this fee from organizations using the codes provided by DTSC. Organizations subject to the fee are required to report annually on an Environmental Fee Return provided by CDTFA. The rates specified in Table 2 are for FY 2022/23. The fees will be collected on the last day of February in 2023 for the fiscal year in which it is assessed.

**Table 2: Environmental Fee FY 2022/23**

Due Date: On the last day of February 2023 on a return provided by CDTFA

Business Size	Fee
Less than 100 employees	\$ 0
100 but less than 250 employees	\$ 1,261
250 but less than 500 employees	\$ 2,706
500 but less than 1,000 employees	\$ 16,000
1,000 or more employees	\$ 54,100

## Counting Employees in Calculating the Fee

*(H&SC section 25205.6(e)):*

The number of employees employed by an organization is the number of persons employed in California for more than 500 hours during the calendar year preceding the calendar year for which the fee is due. The FY 2022/23 Environmental fee is due the last day of February 2023, so the calculation of the number employees will be based on employees in CY 2022.

The following businesses are exempt or excluded from the Environmental Fee:

1. Nonprofit corporations primarily engaged in the provision of residential social and personal care for children, the aged, and special categories of persons with some limits on their ability for self-care, as described in Standard Industrial Classification (SIC) Code 8361 of the SIC Manual published by the United States Office of Management and Budget, 1987 edition or as described in Codes 623220, 623312, and 623990 of the North American Industry Classification System (NAICS) published by the United States Office of Management and Budget, 2017 edition. (H&SC section 25205.6(g)).
2. Insurance companies that pay tax on gross premiums in lieu of all other California taxes and licenses (California Constitution, Article XIII, sections 27 and 28; and Revenue and Taxation Code (R&TC) section 23182).
3. Banks that pay a tax on net income in lieu of all other California taxes and licenses. Banks and insurance companies must pay the Environmental Fee for wholly owned corporations not engaged in banking or insurance (California Constitution, Article XIII, sections 27 and 28; and R&TC section 23182).

## EPA ID Verification Fee

*(H&SC section 25205.16)*

### SB 158 Impact:

Effective January 1, 2022, SB 158 eliminates the requirement to pay an EPA ID Verification Fee.

## Facility Fees

*(Generally: H&SC sections 25174.01, 25205.1 through 25205.4, and 25205.12 through 25205.14, and 25205.17 through 25205.21)*

### SB 158 Impact:

SB 158 establishes the Hazardous Waste Facilities Account within the Hazardous Waste Control Account (H&SC section 25174.01). Effective July 1, 2022, facility fees collected for FY 2022/23 will be deposited into the new account, and upon appropriation by the

Legislature, may be used only for hazardous waste regulatory activities associated with authorized (permitted) facilities. SB 158 also revises the timing of facility fee payments to correspond to the fiscal year for which the fees are assessed. The base rate of \$94,910 for FY 2022/23 is set in H&SC section 25205.2 and is set at a level to generate revenues necessary to fund DTSC's level of service expected in FY 2022/23 and to begin to establish a prudent reserve. Commencing on July 1, 2023, the Board of Environmental Safety (Board) will set the annual fiscal year base rate to correspond to the amount of the annual appropriation for FY 2023/24, up to a specified cap for FY 2023/24, per H&SC section 25205.2.1. Beginning with FY 2024/25, the Board shall adjust the base rate for changes to the CPI as determined by the Department of Industrial Relations. All exemptions to the facility fee are eliminated, effective July 1, 2022.

Any facility treating, storing or disposing of hazardous waste in California must have a hazardous waste facility permit. The facility fee due is determined by the type or types of permits held by a facility operator.

California Assembly Bill (AB) 1772 (Chapter 1325, Statutes of 1992) created permit levels that allow facilities that pose a lesser threat to public health and the environment to handle hazardous waste under certain conditions without being required to secure a full permit (H&SC section 25205.7) or pay facility fees (H&SC section 25205.2).

## Five Permitting Tiers

The following is a brief summary of each of the five tiers. Currently, California has a five-tiered permitting program which matches the statutory/regulatory requirements imposed upon each category of hazardous waste facility to the degree of risk posed by them.

The five permitting tiers, in descending order of regulatory oversight are:

1. **Full Permit Tier**

Includes all facilities requiring a RCRA permit, plus selected California only (non-RCRA) activities pursuant to Title 22 of the CCR.

2. **Standardized Permit Tier**

A facility that manages waste not regulated under RCRA, but regulated as a hazardous waste in California (i.e., non-RCRA hazardous waste). These facilities include, but are not limited to recyclers, oil transfer stations, and precious metal recyclers. Onsite facilities not regulated under RCRA (e.g., generators that treat their hazardous waste) are also eligible for a Standardized Permit.

### 3. **Permit by Rule (PBR) Tier**

A non-RCRA onsite treatment permit for specific waste streams and treatment processes, such as concentrated metal-bearing wastes, concentrated acids or alkalis, wastes posing multiple hazards, and silver recovery.

### 4. **Conditional Authorization (CA) Tier**

A non-RCRA hazardous waste onsite treatment authorization for specific waste streams such as metal-bearing waters, and mostly single-hazardous wastes, some neutralization, and oil/water separation.

### 5. **Conditional Exemption (CE) Tier**

A non-RCRA hazardous waste onsite treatment authorization for small-quantity treatment and other low-risk treatment, including oil-water separation, container rinsing or destruction, gravity settling, and some neutralization.

## Reducing or Terminating Facility Fees

Full and Standardized permitted facilities may be entitled to a reduction in fees when:

- **Size:** The facility notifies DTSC in writing and pledges to operate at a reduced capacity, below the amount the permit allows (H&SC section 25205.18).
- **Type:** A facility that changes the type of authorization must do so using a Permit Modification, for example from treatment to storage. A reduction in the type of authorization may result in lower facility fees (H&SC section 25205.19).
- **Timing:** Facility fees for facilities reducing their capacity or type would be reduced in the next calendar year following the year the change occurs (H&SC section 25205.19(b)).

## Closing Facilities and Ceasing Operations

### Closing Facilities

All facilities that are closing must notify DTSC in writing of their intent to close and when operations actually cease. (H&SC sections 25205.2(d)(4) (through June 30, 2022), 25205.2(i)(4) (effective July 1, 2022), 25201.5(d)(8); and 22 CCR Division 4.5, Chapter 14, Article 7 or Chapter 15, Article 7 and Chapters 20, 21 and 45). A facility shall not be deemed to have stopped treating, storing or disposing of hazardous waste unless it has actually ceased that activity and has notified the department of its intent to close.

## Non-operating Facilities Ceasing Operations

Non-operating treatment or storage facilities owe the Facility Fee for one calendar year after they have ceased operations and notified DTSC of their intent to close. The Facility Fee rate for this additional year after final closure shall be either:

- (1) the largest facility size rate at which the facility has ever been subject to the fee; or
- (2) where prior approval was obtained from, and granted by DTSC for a variance, closure, or permit-by-rule, the largest facility size rate since the department last granted approval for such variance, closure or permit-by-rule. (H&SC section 25205.2(d)(2) (through June 30, 2022), and 25205.2(i)(2) (effective July 1, 2022)).

Non-operating disposal facilities pay twice the applicable full permit Facility Fee for one additional reporting period after operations have ceased. (H&SC section 25205.2(d)(3) (through June 30, 2022), and 25205.2(i)(3) (effective July 1, 2022)).

## Full Permit Facility Fee

*(H&SC sections 25205.1(b), and 25205.2 through 25205.7)*

Each operator of a facility will pay an annual Facility Fee for each reporting period, or any portion thereof, to CDTFA based on the size and type of the facility. Facility means any units or other structures, and all contiguous land, used for the treatment, storage, disposal, or recycling of hazardous waste for which a permit or a grant of interim status has been issued by DTSC for that activity.

Facility Fees are due and payable to CDTFA annually in two installments each at 50% of the annual Facility Fee. Facilities are required to make prepayments and report their facility fees on a Hazardous Waste Facility Fee Return provided by CDTFA. SB 158 changes the timing of the fees from a calendar year assessment to a fiscal year assessment. The rates specified in Table 4 are for the prepayment for CY 2022 and the payments for FY 2022/23. The base rate shall be adjusted annually to reflect changes in the CPI as determined by the Department of Industrial Relations, beginning in FY 2024/25 (H&SC section 25205.2.1).

**Tables 4A: Full Permit Facility Fee for CY 2022 and FY 2022/23**

Due Dates	Prepayments	Base Rate
<b>CY 2022</b>	February 28, 2022 N/A	\$35,943
<b>FY 2022/23</b>	November 30, 2022 February 28, 2023	\$94,910

Facility Type	Rate	CY 2022 Fee	FY 2022/23 Fee
<b>Mini storage facility</b>	25% base rate	\$ 8,986	\$ 23,728
<b>Small storage facility</b>	Base rate	\$ 35,943	\$ 94,910
<b>Large storage facility</b>	2 x base rate	\$ 71,886	\$189,820
<b>Mini treatment facility*</b>	50% base rate	\$ 17,972	\$ 47,455
<b>Small treatment facility</b>	2 x base rate	\$ 71,886	\$189,820
<b>Large treatment facility** (onsite/offsite)</b>	3 x base rate	\$107,829	\$284,730
<b>Disposal facility</b>	10 x base rate	\$359,430	\$949,100

\* "Land treatment units" as defined in H&SC Section 25209.1 pay an annual fee equivalent to two percent of the land disposal fee through June 30, 2022 (See Disposal Fee previous page) in addition to the annual Facility Fee, which is due at the same time as the Facility Fee. (H&SC Section 25209.7)

### Definitions for Full Permit Facilities:

*(H&SC section 25205.1)*

Note: The term "capacity" referred to in the definitions below is the capacity provided in a permit, interim status document or Federal Part A application.

- **Mini-storage facility**  
 A storage facility that stores or has the capacity to store 0.5 ton (1,000 pounds) or less of hazardous waste during any one month of the current reporting period.
- **Small storage facility**  
 A storage facility that stores more than 0.5 tons, but less than 1,000 tons, or has the capacity to store more than 0.5 ton (1,000 pounds), but less than 1,000 tons, of hazardous waste during any one month of the current reporting period.
- **Large storage facility**  
 A storage facility that stores or has the capacity to store 1,000 or more tons of hazardous waste during any one month of the current reporting period.
- **Mini-treatment facility**  
 A treatment facility that treats, land treats, or recycles, or has the capacity to treat, land treat, or recycle 0.5 ton (1,000 pounds) or less of hazardous waste during any one month of the current reporting period.
- **Small treatment facility**  
 A treatment facility that treats, land treats, or recycles, or has the capacity to treat, land treat, or recycle more than 0.5 ton (1,000 pounds), but less than 1,000 tons, of hazardous waste during any month of the current reporting period.
- **Large treatment facility**  
 A treatment facility that treats, land treats, or recycles, or has the capacity to treat, land treat, or recycle 1,000 or more tons of hazardous waste during any one month of the current reporting period.
- **Disposal facility**  
 Any units, structures and all contiguous land, used for the disposal of hazardous waste, for which a permit or grant of interim status has been issued by DTSC pursuant to Article 9 of Chapter 6.5 of Division 20 of the Health and Safety Code. "Disposal" includes only the placement of hazardous waste onto or into the ground for permanent disposition and does not include the placement of hazardous waste in surface impoundments or onto or into the ground solely for purposes of land treatment.

## Full Permit Fee Exemptions:

*(H&SC sections 25205.2, 25205.3 and 25205.12)*

SB 158 removes exemptions from the Full Permit Fees, with staggered effective dates based on the exemptions offered under the applicable H&SC sections. The exemptions under H&SC section 25205.2 below, will be applicable to Full Permit fees for the 2021 and earlier reporting periods, and for the first prepayment of the CY 2022 reporting period. These exemptions become inoperative July 1, 2022, and are repealed as of January 1, 2023. The exemptions under H&SC section 25205.3 become inoperative July 1, 2022 and are repealed as of January 1, 2023. The exemptions under H&SC section 25205.12 were repealed, effective January 1, 2022.

Under H&SC section 25205.2, Full Permit Fees for the first prepayment of the 2022 reporting period, do not apply to the following:

1. A facility that DTSC has issued a variance from the requirement of obtaining a hazardous waste facilities permit or grant of the Interim Status Documents (ISD) is not subject to the fee, for any reporting period following the reporting period in which the variance was granted by the department.
2. A treatment facility engaging in treatment exclusively to accomplish a removal or remedial action or a corrective action in accordance with an order issued by the U.S. EPA or an order issued by DTSC pursuant to section 25187 (order for corrective action), or if the removal or remedial action is carried out pursuant to a removal action work plan or a remedial action plan pursuant to section 25256.1 and is authorized to operate pursuant to section 25358.9, if the facility was put in operation solely for the purposes of complying with that order. DTSC shall instead assess a fee for that facility for the actual time spent by DTSC for the inspection and oversight of that facility. DTSC shall base the fee on DTSC's work standards and shall assess the fee on an hourly basis.

Under H&SC sections 25205.3, Full Permit Fees for the 2021 and earlier reporting period, do not apply to the following facilities and are exempt:

1. A household hazardous waste collection facility operated pursuant to Article 10.8 of Chapter 6.5 of Division 10 of the Health and Safety Code (commencing with section 25218).

2. A facility operated by a local government agency, or by any person operating a hazardous waste collection program under an agreement with a public agency, that is used for wastes that meet the requirements of H&SC section 25174.7(a)(3) [local vector control agency generated hazardous waste].
3. That portion of a permitted solid waste facility permitted pursuant to Chapter 3 (commencing with section 44001) of Part 4 of Division 30 of the Public Resources Code, that is used for the segregation, handling, and storage of hazardous waste separated from solid waste loads received by the facility, pursuant to a load checking program.
4. A facility used solely for the treatment, storage, disposal, or recycling of hazardous waste that results when a public agency or its contractor investigates, removes, or remedies a release of hazardous waste caused by another person.
5. A facility that has been issued a permit for the purpose of storing hazardous waste onsite, and whose permit has expired, if all the following has occurred:
  - a. The facility has received no waste from offsite since the permit expired;
  - b. The owner or operator gave DTSC timely notification of intent to close the facility, pursuant to regulations adopted by DTSC;
  - c. At least 90 days have elapsed since the owner or operator gave DTSC that notification; and
  - d. DTSC did not complete its review of the closure plan within 90 days of receiving the notification.

Under H&SC section 25205.12, all exemptions for Full Permit Fees for the 2021 and earlier reporting period remain in effect only until January 1, 2022 and as of that date are repealed.

## Postclosure Permit Facility Fee

*(H&SC sections 25205.4(c)(9) and 25247(d)(3) through June 30, 2022, and 25205.2 for FY 2022/23.)*

Postclosure Fee applies to Full Permit facilities with postclosure permits. The Postclosure Fee, through June 30, 2022, also applies at the time of commencement of the postclosure period to a facility owner or operator when DTSC imposes a postclosure plan in the form of an enforcement order or enforceable agreement. SB 158 changes

the timing of the fees from a calendar year assessment to a fiscal year assessment. Table 5 are CY 2022 and FY 2022/23 post closure permit facility fees. These fees shall be subject to annual CPI adjustment, beginning in FY 2024/25 (H&SC section 25205.2.1).

**Tables 5: Postclosure Permit Facility Fee for CY 2022 and FY 2022/23**

**CY 2022**

Due Dates:

- One Prepayment - February 28, 2022 (during the reporting period)
- Reconciliation - August 31, 2022 (any remaining balance)

<b>DTSC-Lead Sites*</b>	<b>During first five years of postclosure period</b>	<b>During remaining years of postclosure period</b>
<b>Small Facility</b>	\$ 5,725	\$ 3,050
<b>Medium Facility</b>	\$11,450	\$ 6,100
<b>Large Facility</b>	\$17,175	\$10,300

**FY 2022/23**

Due Dates:

Two equal payments –

- November 30, 2022 (during the reporting period)
- February 28, 2023 (during the reporting period)

<b>DTSC-Lead Sites*</b>	<b>During first five years of postclosure period</b>	<b>During first five years of postclosure period</b>
<b>Small Facility</b>	\$ 26,980	\$ 14,375
<b>Medium Facility</b>	\$ 53,960	\$ 28,750
<b>Large Facility</b>	\$ 80,940	\$ 48,550

\* These fees will be reduced by 50 percent for any facility for which an agency other than DTSC (i.e., a Regional Water Quality Control Board) is the lead agency. (H&SC section 25204.6(b)(1))

## Standardized Permit Facility Fee

(H&SC sections 25201.6, 25205.4(e) through June 30, 2022, and 25205.2, effective July 1, 2022, for FY 2022/23)

California SB 27 (Chapter 410, Statutes of 1993) created the standardized permit tier. Standardized permits are only for non-RCRA facilities. Each facility will pay an annual Facility Fee in addition to the Activity Fee (see Activity Fees H&SC section 25205.7) assessed upon application for a permit or renewal. The amount of the annual Facility Fee is determined by the size and series designation of the facility. Facility means any units or other structures, and all contiguous land, used for the treatment, storage, disposal, or recycling of hazardous waste for which a permit or a grant of interim status has been issued by DTSC for that activity. SB 158 changes the timing of the fees from a calendar year assessment to a fiscal year assessment. Facilities are required to report their facility fees on a Hazardous Waste Facility Fee Return provided by CDTFA. All Activity Fees will be billed by DTSC. Table 6 lists the Facility Fees for a Standardized Permit in CY 2022 and FY 2022/23. Standardized permit Facility Fees shall be subject to annual CPI adjustment, beginning in FY 2024/25 (H&SC section 25205.2.1).

**Table 6: Standardized Permit for CY 2022 and FY 2022/23**

### CY 2022

Due Dates:

- One Prepayment - February 28, 2022 (during the reporting period)
- Reconciliation - August 31, 2022 (any remaining balance)

Series	Fee
<b>Series A</b>	\$11,730
<b>Series B</b>	\$ 5,497
<b>Series C</b>	\$ 4,617
<b>Small Quantity Series C</b>	\$ 2,308

## FY 2022/23

Due Dates:

Two equal payments –

- November 30, 2022 (during the reporting period)
- February 28, 2023 (during the reporting period)

Series	Fee
<b>Series A</b>	\$ 55,280
<b>Series B</b>	\$ 25,910
<b>Series C</b>	\$ 21,760
<b>Small Quantity Series C</b>	\$ 10,880

Definitions for Standardized Permit Facilities: (H&SC sections 25201.6, 25205.4(e)(4) through June 30, 2022, and 25205.2, effective July 1, 2022, for FY 2022/23)

### “SERIES A”

Standardized Permit means a permit issued to a hazardous waste facility that meets one or more of the following conditions:

1. The total influent volume of liquid hazardous waste treated is greater than 50,000 gallons per calendar month.
2. The total volume of solid hazardous waste treated is greater than 100,000 pounds per calendar month.
3. Where both liquid and solid hazardous wastes are being treated, either the total volume of liquid waste treated exceeds the volume specified in number one (1) above, or the total weight of solid hazardous waste treated exceeds the weight specified in number two (2) above.
4. The total storage design capacity is greater than 500,000 gallons for liquid hazardous waste.
5. The total storage design capacity is greater than 500 tons for solid hazardous waste.

6. Where both liquid and solid hazardous waste are being stored, the total volume of liquid waste stored exceeds the volume specified in number four (4) above, or the total volume of solid hazardous waste stored exceeds the volume specified in number five (5) above.
7. A volume of liquid or solid hazardous waste is stored at the hazardous waste facility for more than one calendar year.

### **“SERIES B”**

Standardized Permit means a permit issued to a hazardous waste facility that does not store liquid or solid hazardous waste for a period of more than one calendar year, and that meets one or more of the following conditions:

1. The total influent volume of liquid hazardous waste treated is greater than 5,000 gallons but less than 50,000 gallons per calendar month.
2. The total volume of solid hazardous waste treated is greater than 10,000 pounds but less than 100,000 pounds per calendar month.
3. Where both liquid and solid hazardous wastes are being treated, the total volume of liquid hazardous waste treated does not exceed the volume specified in number one (1) above, and the volume of solid hazardous waste treated does not exceed the volume specified in number two (2) above.
4. The total storage design capacity is greater than 50,000 gallons but less than 500,000 gallons for liquid hazardous waste.
5. The total storage design capacity is greater than 100,000 pounds but less than 500 tons for solid hazardous waste.
6. Where both liquid and solid hazardous wastes are being stored, the total volume of liquid hazardous waste stored does not exceed the volume specified in number four (4) above, and the total volume of solid hazardous waste stored does not exceed the volume specified in number five (5) above.

### **“SERIES C”**

Standardized Permit means a permit issued to a hazardous waste facility that does not store liquid or solid hazardous waste for a period of more than one calendar year, that does not conduct thermal treatment of hazardous waste, with the exception of evaporation, and meets all of the following conditions:

1. The total influent volume of liquid hazardous waste treated does not exceed 5,000 gallons per calendar month.
2. The total volume of solid hazardous waste treated does not exceed 10,000 pounds per calendar month.
3. Where both liquid and solid hazardous wastes are being treated, the total volume of liquid hazardous waste treated does not exceed the volume specified in number one (1) above, and the total volume of solid hazardous wastes treated does not exceed the volume specified in number two (2) above.
4. The total storage design capacity does not exceed 50,000 gallons for liquid hazardous waste.
5. The total storage design capacity does not exceed 100,000 pounds for solid hazardous waste.
6. Where both liquid and solid hazardous waste are being stored, the total volume of liquid hazardous waste stored does not exceed the volume specified in number four (4) above, and the total weight of solid hazardous waste stored does not exceed the weight specified in number five (5) above.

### **“SMALL QUANTITY SERIES C”**

Standardized Permit Facility is a hazardous waste facility that treats not more than 1,500 gallons of liquid hazardous waste and not more than 3,000 pounds of solid hazardous waste in any calendar month, and the total facility storage capacity does not exceed 15,000 gallons of liquid hazardous waste and 30,000 pounds of solid hazardous waste. If the facility both treats and stores hazardous waste, the facility does not exceed the volume limitations specified above for each individual activity.

### **Permits-By-Rule (PBR)**

*(H&SC section 25205.14(a) (until July 1, 2022), section 25205.2 (effective July 1, 2022), and section 67450.3 of Title 22 CCR)*

The PBR tier allows onsite treatment of non-RCRA and RCRA-exempt hazardous waste. This tier is for more hazardous and higher volume waste streams and processes than the Conditional Authorization or Conditional Exemption tiers.

PBR authorizations for Fixed Treatment Units (FTU) are processed through the local CUPA (or DTSC in a non-CUPA jurisdiction), while Transportable Treatment Units (TTU) are processed through DTSC (see below for definitions of FTU and TTU). TTUs require site-specific notification to DTSC prior to conducting treatment at any site

Once authorized under PBR, you will be billed annually, until the unit (both FTU and TTU) has been certified closed and you submit the FTU closure certification to your CUPA or your TTU closure certification to DTSC. Also, if you operate during any part of a calendar year, you may be billed a PBR fee for the entire year. Note: Each CUPA may institute a single fee system that allows for a single billing to cover the costs of oversight and inspection of your FTU hazardous waste management activities (treatment, storage and disposal).

### Conditional Authorization or Conditional Exemption

*(H&SC sections 25200.3, 25201.5, 25205.14(b) and (c) (until July 1, 2022), section 25205.2 (on and after July 1, 2022))*

The two forms of authorization in the lowest tier are Conditional Authorization and Conditional Exemption.

#### Conditional Authorization

The Conditionally Authorized tier allows onsite treatment of non-RCRA and RCRA-exempt hazardous waste. This tier is limited to single-hazard wastes and treatment in the unit cannot exceed 5,000 gallons or 45,000 pounds in a calendar month. However, there is no volume limit for treatment of specified dilute aqueous, acidic, alkaline, or oily wastes.

- Only Fixed Treatment Units (FTUs) are eligible for authorization under this tier, while Transportable Treatment Units (TTUs) are not (see below).

#### Conditional Exemption

The Conditionally Exempt tier allows onsite treatment of non-RCA and RCRA-exempt hazardous waste. This tier is for smaller quantities or less risky waste and treatment methods. This tier includes Conditionally Exempt:

- Small Quantity Treatment (TTU or FTU eligible)
- Specified Waste Streams (TTU or FTU eligible)

- Commercial Laundries (FTU only)
- Limited (FTU only)

## Fixed Treatment Units & Transportable Treatment Units

### Fixed Treatment Unit (FTU)

An FTU is any equipment that performs hazardous waste treatment and is permanently stationed at a single facility regardless of the period or frequency of treatment. FTUs may be authorized under the Permit by Rule tier, the Conditionally Authorized tier and the Conditionally Exempt tier.

FTU Conditional Authorizations and Conditional Exemptions are processed through the local CUPA (or DTSC in non-CUPA jurisdictions). Once authorized, you will be billed annually by your local CUPA until the unit has been certified closed and you submit your closure certification to your CUPA. If you operate during any part of a calendar year, you may be billed a fee for the entire year.

Your CUPA can provide you with more specific fee information as fees may vary with each county. Note: Each CUPA may institute a single fee system that allows for a single billing to cover the costs of oversight and inspection of your hazardous waste management activities (treatment, storage and disposal).

**Table 7: Fixed Treatment Unit Fee CY 2022 for Non-CUPA Jurisdictions Only**

Due Date: 30 Days after billing by CDTFA

Reporting period begins January 1 each year

Type of Permit	Fee
<b>Permit by Rule</b>	\$4,600 per unit
<b>Conditional Authorization</b>	\$4,600 per unit
<b>Conditional Exemption</b>	\$180 per unit*

\* Not subject to CPI adjustment

### Transportable Treatment Unit (TTU)

A TTU Unit is any mobile equipment that performs onsite treatment of hazardous waste using proven treatment processes. A TTU is transported to a facility to perform a treatment and is not permanently stationed at a single site. TTUs may be authorized

under the Full Permit tier, the Standardized Permit tier, the Permit by Rule tier and the Conditionally Exempt tier. Full Permit and Standardized Permit tier rates are listed below in this Fee Summary.

A TTU operating under either the Specified Waste Streams or Small Quantity Treatment Conditional Exemption must obtain authorization through DTSC and requires both a unit-specific and site-specific notification to DTSC prior to conducting treatment at any site. Once authorized, you will be billed annually until the TTU has been certified closed and you submit the TTU closure certification to DTSC. Also, if you operate the TTU during any part of a calendar year, you may be billed a fee for the entire year.

TTU fees are authorized per treatment unit and not per facility. The rates specified in Table 8 are for CY 2022 and are adjusted annually to reflect changes in the CPI as determined by the Department of Industrial Relations.

**Table 8: Transportable Treatment Unit Fee CY 2022**

Due Date: 30 Days after billing by CDTFA  
Reporting period begins January 1 each year

Type of Permit	Fee
<b>Permit by Rule</b>	\$4,600 per unit
<b>Conditional Authorization</b>	\$4,600 per unit
<b>Conditional Exemption</b>	\$180 per unit*

\* Rate fixed by statute

## Generation and Handling Fee

*(H&SC sections 25174.8, 25205.1, 25205.5, 25205.5.01, 25205.5.1, 25205.22, and 25250.24; Section 3000 of Title 18 CCR; and Section 66269.2 of Title 22 CCR)*

### SB 158 Impact:

Effective January 1, 2022, SB 158 repeals the Generator Fee and instead establishes a Generation and Handling (GH) fee. SB 158 establishes the timing of the GH Fee to be a fiscal year fee, applied to hazardous wastes generated in the previous calendar year. The new GH fee will no longer be based on a tiered system as the generator fee was, but instead, charges a set per ton rate. The payments of the GH Fee will be due in the fiscal

year the fee is assessed. The fee for FY 2022/23 is set in H&SC section 25205.5 and is set at a level that will generate revenues necessary to fund DTSC’s expected level of service in FY 2022/23 and begin establishing a prudent reserve. Commencing on July 1, 2023, the Board of Environmental Safety will set the annual GH Fee to correspond to the annual appropriation amount for FY 2023/24, up to a specified cap for FY 2023/24, per H&SC section 25205.5.01. Beginning with FY 2024/25, the Board shall adjust the GH Fee for changes to the CPI as determined by the Department of Industrial Relations. SB 158 removes exemptions previously allowed for the Generator Fee. The GH Fee now includes imported hazardous waste and used oil as being subject to the GH Fee. The description below applies to the GH Fee for FY 2022/23.

Every generator that produces five tons or more of hazardous waste will pay CDTFA a GH Fee for each generator site for each calendar year, or portion thereof. Hazardous Waste facilities permitted under a full or standardized permit that pay annual Facility Fees for a specific site may deduct the amount of hazardous waste that is stored, bulked, or transferred offsite, from the calculation of the GH Fee due for that site. Generators are required to report the amount of waste generated on a hazardous waste Generation and Handling Fee return provided by CDTFA. The rates specified in Table 9 are for FY 2022/23 for hazardous waste generated in CY 2021.

**Table 9: Generation and Handling Fee FY 2022/23**

Rate	Due Dates
<b>First Prepayment (50%)</b>	November 30, 2022 (during reporting period)
<b>Final Payment</b>	February 28, 2023 (after the reporting period)
<b>Base Rate: \$ 0/ton</b>	Less than 5 tons/year
<b>\$49.25/ton or fraction of a ton</b>	5 or more tons/year

### Land Disposal Fee for Generators:

In addition, generators who dispose of waste to land may be subject to Land Disposal Fees imposed pursuant to H&SC section 25174.1, through the June 2022 and earlier reporting periods.

## Standard Conversion Factors:

All quantities in the Hazardous Waste Tracking System (HWTS) are reported in tons for standard reports and calculations. Volumes of hazardous waste reported in cubic yards on the manifest are converted to tons using a conversion factor that is specific to the state waste code. DTSC takes every precaution to ensure the accuracy of data in the HWTS; however, conversion factors may underestimate or overestimate the actual weight of waste, especially with waste types that are highly variable in composition. Consequently, conversions of wastes such as asbestos and contaminated soils, reported in volume and other measurements (e.g. bags) to tons, may not reflect the true tonnage generated or transported. Therefore, retention of weight tickets for each manifest is strongly recommended for accurate measurements. The weight tickets can be referenced by the generator to later file their generator fee return with CDTFA and/or the weight tickets can later be produced to respond to an audit initiated by CDTFA.

Effective January 1, 2016, the following standard conversion factors were implemented by DTSC in calculating Generator Fees.

- Asbestos (State Waste Code # 151) – Conversion Factor = 0.23
- Contaminated Soils (State Waste Code # 611) – Conversion Factor = 1.41

## The following materials are not hazardous wastes for purposes of fee assessments:

1. Hazardous materials that are recycled and used onsite and are not transferred offsite.
2. Aqueous waste treated in a treatment unit operating, or that subsequently operates, pursuant to a permit by rule, or pursuant to H&SC section 25200.3 or 25201.5. However, hazardous waste generated by a treatment unit treating waste pursuant to a permit-by-rule, by a unit that subsequently obtains a permit-by-rule or other authorization pursuant to H&SC sections 25200.3 or 25201.5 is hazardous waste.

## Generation and Handling Fees do not apply to:

1. Hazardous waste that results when a government agency, or its contractor, removes or remedies a release of hazardous waste in the state caused by another person (H&SC section 25174.8).
2. Hazardous waste generated or disposed of by a public agency operating a household hazardous waste collection facility in the state pursuant to Article 10.8,

including hazardous waste received from conditionally exempt small quantity commercial generators (H&SC section 25174.8).

3. Hazardous waste disposed of, or submitted for disposal or treatment, which is discovered and separated from solid waste as part of a load checking program (H&SC section 25174.8).
4. Used oil collected from the public by certified used oil collection centers (H&SC section 25174.8).

## Lead-Acid Battery Recycling Act of 2016

*(AB 2153, Chapter 666, Statutes of 2016) (Article 10.5 (commencing with section 25215) of Chapter 6.5 of Division 20 of the H&SC)*

### California Battery Fee

*(H&SC section 25215.25)*

On and after April 1, 2017, until March 31, 2022, this law requires a California Battery Fee in the amount of \$1 to be imposed on a "person," as specified in statute, for each qualifying lead-acid battery purchased from a dealer. The bill authorizes the dealer to retain one and one-half percent of the fee as reimbursement for any costs associated with the collection of the fee and requires the dealer to remit the remainder to CDTFA. On and after April 1, 2022, the law increases the California Battery Fee to \$2. On and after January 1, 2020, if a new motor vehicle dealer sells or leases to a person a used vehicle into which the new motor vehicle dealer has incorporated a replacement lead-acid battery, that the California Battery Fee does not apply to the person with regard to the replacement lead-acid battery.

### Manufacturer Battery Fee

*(H&SC section 25215.35)*

Until April 1, 2022, this law requires a fee of \$1 to be imposed on a "manufacturer," as specified in statute, of lead-acid batteries for each lead-acid battery it sells at retail to a person in California or that it sells to a dealer, wholesaler, distributor, or other person for retail sale in California. On and after April 1, 2022, the Manufacture Battery Fee increases from \$1 to \$2, and this fee continues indefinitely without an expiration date.

## Manifest Forms

*(Section 66262.20 of Title 22 CCR.)*

### **SB 158 Impact:**

SB 158 does not change the requirement to submit a manifest for transported hazardous waste.

A generator who transports, or offers for transport hazardous waste for off-site transfer, treatment, storage, or disposal, or a treatment, storage, and disposal facility who offers for transport a rejected hazardous waste load, shall prepare a Uniform Hazardous Waste Manifest (OMB Control number 2050-0039) on EPA Form 8700-22, and if necessary, a Continuation Sheet on EPA Form 8700-22A before the waste is transported off-site. The national Uniform Hazardous Waste Manifest Form is available only from registered printers approved by the U.S. EPA. Registered printers are available via the U.S. EPA website<sup>2</sup>.

## Manifest Reprocessing Fee

*(H&SC section 25160.5)*

### **SB 158 Impact:**

SB 158 does not eliminate the authority to assess the Manifest Reprocessing Fee.

DTSC has the authority to assess a \$20 reprocessing fee for each incomplete or improperly completed paper manifest that is returned to the person who submitted the manifest. The person whom it was returned shall, within 30 days from the date of receipt of the returned manifest, submit the fee to DTSC to accompany the resubmitted manifest.

---

<sup>2</sup> <https://www.epa.gov/hwgenerators/approved-registered-printers-epas-manifest-registry>

## Manifest User Fee

*(H&SC section 25205.15)*

### SB 158 Impact:

SB 158 eliminates the Manifest User Fee effective January 1, 2022, so no fees will be collected for CY 2022. Fees for CY 2021 will be collectible during the 2022 eVQ annual filing period from July 1, 2022, to December 31, 2022.

## Other Miscellaneous Fees

*(State Administrative Manual Section 8740)*

In accordance with the requirements of the State Administrative Manual, DTSC may charge a fee for any requests to retrieve and copy Departmental records.

## Sale of Materials

*(H&SC section 25201.11)*

DTSC may sell, lease, or license for commercial or noncommercial use any work including, but not limited to, video recordings, audio recordings, books, pamphlets, and computer software that DTSC produces whether DTSC is entitled to that copyright protection or not.

## Fees Related to Legislative History

The Hazardous Substance Account (HSA) was created by Chapter 756, Statutes of 1981. In 1989, SB 475 (Torres,

c. 269, stats. 1989) moved the Land Disposal Fee from the HWCA to the HSA, established the Environmental Fee for corporations with 50 or more employees, set the base rate for the Disposal Fee at \$52.50, added a new category for waste transported out of state, and established fees for oversight activities provided by the DTSC Site Mitigation Program.

In FY 1990/91, SB 1857 (Torres, c. 1268, stats. 1990) eliminated the Superfund tax and the discount for disposal to double-lined surface impoundments, and reduced the base rate for mining waste from 25 percent to 13 percent. In addition, the legislation doubled the disposal fee base rate from \$52.50 to \$105.00 per ton, and made several technical and corrective changes to the hazardous waste funding program. These rates became effective on

January 1, 1991.

In FY 1991/92, SB 48 (Thompson, c. 766, stats. 1991) created the Railroad Accident and Prevention Fund and mandated DTSC to establish a fee to be paid by surface transporters of hazardous materials to fund the Railroad Accident Prevention and Immediate Deployment Force.

In FY 1992/93, SB 1469 (Calderon, c. 852, stats. 1992) created the Federal Receipts Account for fees collected from Federal Agencies, combined the HWCA and the HSA accounts into the HWCA, and created the Site Remediation Account, which was funded from the HWCA to pay for direct site cleanup. Land Disposal Fees for waste going out of state were eliminated, and the Disposal Fee for the Resource Conservation and Recovery Act (Federal), 42 USC Section 6901, 40 Code of Federal Regulation (RCRA) waste dropped from \$105 to \$42.42 per ton. This bill also created two new fees, the Manifest User Fee and the EPA ID Number Verification Fee. AB 1772 (Polanco, c. 1325, stats. 1992) established a new Tiered Permitting Fee, exempted certain onsite treatments from past and future Facility Fees, and established new annual fees for companies that operate in the lower permitting tiers.

In FY 1993/94, SB 27 (Wright, c. 410, stats. 1993) set new fees for the Standardized Permits for hazardous waste treatment and storage facilities that accept hazardous waste from other locations and that are not required to obtain a permit under federal law (RCRA). Also, SB 922 (Calderon, c. 1145, stats. 1993) made substantial changes to the California Hazardous Substances Tax Law, effective January 1, 1994. Some of these

changes included reducing the Disposal Fee on cleanup waste, eliminating most Site Mitigation Activity Fees, reducing the Manifest Fee on recycled wastes, increasing the Generator Fee, and limiting the liability for Facility Fees after closure. SB 1123 (Calderon, c. 65, stats. 1994) exempted facilities and operators from any Permit Modification Fee liability resulting from a revision of the facility's or operator's closure plan.

In FY 1994/95, AB 3582 (Richter, c. 1154, stats. 1994) established effective January 1, 1995, that oil-contaminated bilge water that requires a National Pollutant Discharge Elimination System Permit from a regional water quality control board was no longer considered to be "used oil." Such oil-contaminated bilge water was now subject to the Hazardous Waste Generator Fee if shipped off-site for treatment. Bilge water treated in an onsite treatment unit authorized to operate under Permit-by-Rule (PBR), under Conditional Authorization, or under Conditional Exemption remained exempt from the Generator Fee under H&SC section 25205.5(e)(2). The effluent or residue from the treatment process is subject to the fee unless another exemption applies. Also, SB 1815 (Wright, c. 548, stats. 1994) provided that the base rate for a Standardized Permit would be the rate for the 1993-94 fiscal year. SB 1082 (Calderon, c. 418, stats. 1993) created the Certified Unified Program Agency (CUPA) and instituted a single fee system specifically for the support of the local CUPAs. Each CUPA collects a state surcharge, determined by the California Environmental Protection Agency, to fund the state's costs of overseeing the program. DTSC is one of the agencies that receive a portion of the state surcharge.

In FY 1995/96, SB 1222 (Calderon, c. 638, stats. 1995) lowered the rate for non-RCRA cleanup waste to \$7.50 per ton, lowered the rate for other non-RCRA waste to \$17.94 per ton, and added a reduced fee for designated treatment residues disposed in-state. In addition, this bill required hazardous waste disposal facilities to collect the Disposal Fee and transmit the fee to BOE (the predecessor agency to CDTFA) and eliminated the requirement for facilities receiving non-RCRA waste imported for treatment, recycling or disposal to pay the Generator Fee. AB 1906 (Sher, c. 637, stats. 1995) consolidated fee return filing and provided for prepayment for the Facility, Generator and Generator Surcharge Fees. SB 1964 (Figueroa, c. 630, stats. 1995) required annual adjustments to the Hazardous Waste Fees to be based on the CPI for California rather than the United States Index. SB 1291 (Wright, c. 640, stats. 1995) created procedures for a facility to convert from a full permit or ISD to an onsite tier, either PBR, Conditional Authorization or Conditional Exemption, and established a fee of \$500 for the permit modification to make the conversion. Fees are paid only on the highest tier.

In FY 1996/97, AB 2776 (Miller, c. 999, stats. 1996) allowed DTSC to, until January 1, 2002, grant temporary relief from certain requirements by issuing a single variance to all affected businesses and allowing a variance applicant to enter into an optional cost

payment agreement as an alternative to the flat rate variance fee. SB 1532 (Wright, c. 259, stats. 1996) changed existing law to require that certain facilities operating under a standardized permit or grant of interim status receive a credit for the annual Facility Fee. SB 1532 also exempted a generator from the annual Generator Fee if the generator's facility received a credit under the Facility Fee Provision for a specific site. SB 1839 specified that, effective July 20, 1996; a Generator Fee prepayment was not required for a fee payer whose prepayment due was less than \$500.

In FY 1997/98, SB 660 (Sher, c. 870, stats. 1997) enacted the Environmental Cleanup and Fee Reform Act of 1997 and implemented many of the recommendations made by the Fee Reform Task Force mandated by SB 1222. Effective January 1, 1998, SB 660 eliminated the Generator Fee surcharge and restructured the Generator Fee, Disposal Fee, Facility Fee and the Environmental Fee. Effective July 1, 1998, the fees for a preliminary endangerment assessment for site mitigation, extremely hazardous waste, border zone property assessment, waste classification, variance, and class I modifications were eliminated. Variances (except variances for transporters), waste classifications, and preliminary endangerment assessments became cost reimbursement activities. In addition, permitted facilities may submit a self-certification letter ("pledge letter") which allows the permitted facility to pay a reduced Facility Fee corresponding to the reduced amount of hazardous waste being generated at those respective facilities. SB 660 also established the Toxic Substances Control Account (TSCA) to receive the Environmental Fee, cost reimbursements and other revenues not listed in this summary. TSCA funds are to be expended for site remediation, technology programs, and administration and implementation of cleanup programs.

In FY 1998/99, SB 2240 (Committee on Environmental Quality, c. 882, stats. 1998) allowed DTSC to choose either the Standard Industrial Classification system or the North American Industry Classification system, whichever it deemed suitable, when providing BOE (the predecessor agency to CDTFA) with a list of codes for the Environmental Fee. While SB 660 eliminated the Manifest Fee for manifests used solely for recycled waste, this bill added a fee for manifests used to transport hazardous wastes derived from air compliance solvents.

In FY 1999/00, SB 606 (O'Connell, c. 745, stats. 1999) added a penalty to the Disposal Fee of five (5) times the normal Disposal Fee rate for recyclable wastes that have been disposed on land. This penalty is in addition to any other penalties that DTSC may assess through an enforcement action.

In FY 2000/01, AB 2309, which would have extended the sunset date for the reduction of fees for Disposal and Facility Fees set by SB 660 (Sher, c. 870, stats. 1997), was vetoed.

In FY 2001/02, AB 1259 (Wiggins, c. 461, stats. 2001) required DTSC to suspend or deny the permit of a hazardous waste facility if the owner or operator is delinquent in paying fees or penalties owed to DTSC provided all appeal rights have been exhausted or have expired.

In FY 2002/03, there were no changes to the fee structure.

In FY 2003/04, AB 1247 (Aghazarian, c. 286, stats. 2003) authorized DTSC to use enforcement orders and enforceable agreements to impose the requirements of postclosure plans at hazardous waste facilities in lieu of issuing postclosure permits. If DTSC imposes postclosure plan requirements through an enforcement order or enforceable agreement, the facility owner or operator is required to pay DTSC's Activity Fee and annual Postclosure Facility Fee. DTSC may only impose postclosure plan requirements through enforcement orders and enforceable agreements from January 1, 2004, to January 1, 2007.

In FY 2004/05 there were no changes to the fee structure.

In FY 2005/06, AB 1803 (Committee on Budget, c.77, stats.2006) authorized DTSC to expand the applicability of the Environmental Fee beyond corporations. Under AB 1803, the language of H&SC Section 25205.6(a) was amended to include the definition of "organization," which means a corporation, limited liability company, limited partnership, limited liability partnership, general partnership, and sole proprietorship. In addition, AB 1803 exempted the fees of the first four non-recycled manifests for organizations with less than 100 California employees. AB 1813 (Committee on Budget, c.344, stats. 2006) stipulated that the amended Environmental Fee will go into effect for CY 2007, and was due by February 29, 2008.

In FY 2006/07 there were no changes to the fee structure.

In FY 2007/08 there were no changes to the fee structure.

In FY 2008/09 there were no changes to the fee structure.

In FY 2009/10, SB 855 (Committee on Budget, c. 718, stats. 2010) clarified that all penalties collected associated with lead in jewelry, lead wheel weights, and toxics in consumer product packaging will be deposited into TSCA.

In FY 2010/11 there were no changes to the fee structure.

In FY 2011/12 there were no changes to the fee structure.

In FY 2012/13 there were no changes to the fee structure.

In FY 2014/15, SB 1249 (Hill, c. 756, stats. 2014) authorizes DTSC to collect an annual fee from metal shredding facilities at a rate sufficient to cover its costs in establishing and implementing alternative hazardous waste management standards within those facilities.

In FY 2016/17, SB 839 (Senate Committee on Budget, c. 340, stats. 2016) alters how the costs of processing a hazardous waste facility permit application or a class 2 or class 3 permit modification are assessed. SB 839 requires anyone applying for a new permit, renewal of a permit, standardized permit or post closure permit or requesting certain permit modifications to enter into a written agreement to reimburse DTSC for its costs incurred in processing the application or request. This requirement also applies to requests for variances and waste classification determinations. SB 839 eliminated the option of paying a flat-rate Activity Fee for these applications and requests submitted on or after April 1, 2016.

In FY2016/17, SB 1325 (De León, c. 676, stats. 2016) was passed which allows DTSC, to the extent consistent with the federal act, to impose the requirements of a hazardous waste facility postclosure plan on the owner or operator of a facility through the issuance of an enforcement order, entering into an enforceable agreement, or issuing a postclosure permit. Health and Safety Code section 25247(d)(3) was amended to provide that when an enforcement order or agreement is utilized for the postclosure plan in lieu of a postclosure permit, the owner or operator shall enter into a cost reimbursement agreement with DTSC pursuant to Health and Safety Code section 25205.7 (Activity Fee reimbursement agreement) at the time the plan is submitted. Additionally, upon commencement of the postclosure period the owner/operator shall pay the postclosure permit fee required by subdivision (c)(9) of Health and Safety Code section 25205.4 (annual Facility Fee for a Postclosure Permit). The commencement of the postclosure period for purposes of the fee shall be the effective date of the postclosure permit, enforcement order, or enforceable agreement.

In FY 2016/17, AB 2153 (Garcia, c. 666, stats. 2016) The Lead-Acid Battery Recycling Act of 2016 establishes in part a Manufacturers Battery Fee and a California Battery Fee. A Manufacturer Battery Fee of one dollar (\$1), shall be imposed on a manufacturer of lead-acid batteries for each lead-acid battery it sells at retail to a person in California or that it sells to a dealer, wholesaler, distributor, or other person for retail sale in California. The fee becomes inoperative on April 1, 2022, and as of January 1, 2023 is repealed, unless a later enacted statute becomes operative on or before January 1, 2023. A California Battery Fee shall be imposed on a person for each replacement lead-acid battery purchased from a dealer of the type specified in statute. The California Battery Fee is set at one dollar (\$1) on and after April 1, 2017, until March 31, 2022, and after April 1, 2022, the amount of the fee shall be two dollars (\$2). Revenues collected

pursuant to the Act will be deposited into a newly established Lead-Acid Battery Cleanup Fund and be used in part, and on appropriation by the Legislature, to fund response actions at any area of the state that is reasonably suspected to have been contaminated by the operation a lead-acid battery recycling facility.

In FY 2017/18 there were no changes to the fee structure.

In FY 2018/19, AB 181 (Maienschein, c. 797, stats. 2019) was passed and amended the Activity fee cost reimbursement agreement under Health & Safety Code Section 25205.7. AM 181 eliminated the requirement from 25% advance payment with respect to a reimbursement agreement entered into by a facility owned by a federal agency under Section 25205.7, subd. (a)(1). Additionally, AB 142 (Garcia, c. 860, stats. 2019) was passed and amended the Manufacture Battery Fee and California Battery Fee increases from \$1 to \$2, and this fee continues indefinitely without an expiration date. Further, AB 142 provided on and after January 1, 2020, if a new motor vehicle dealer sells or leases to a person a used vehicle into which the new motor vehicle dealer has incorporated a replacement lead- acid battery, that the California Battery Fee does not apply to the person with regard to that replacement lead-acid battery.

In FY 2019/20, AB 142 (Garcia, c. 860. Stats. 2019) was passed and amended the Lead-Acid Battery Recycling Act of 2016. Among other things, AB 142 added a new exemption for the California battery fee. On and after January 1, 2020, if a new motor vehicle dealer sells or leases to a person a used vehicle into which the new motor vehicle dealer has incorporated a replacement lead-acid battery, that the California battery fee does not apply to the person with regard to the replacement lead-acid battery. AB 142 also increased the manufacturer battery fee and the California battery fee (from replacement batteries purchased from a dealer) to \$2 starting 4/1/22 and provided that the fee will continue indefinitely. This bill also authorized that on and after January 1, 2020, a person who manufactures a lead-acid battery and is not subject to the jurisdiction of the state to agree in writing with the importer, as defined, of that lead-acid battery to pay the manufacturer battery fee on behalf of the importer. AB 142 also authorizes the disclosure of certain registration information of a person registered to pay the manufacturer battery fee.

In FY 2019/20 SB 68: Hazardous Waste - Treated Wood Waste – Bill was vetoed. Until December 31, 2020, Section 25150.7 of the Health and Safety Code authorizes alternative management standards for treated wood waste in addition to disposal in either a class I hazardous waste landfill or in a composite-lined portion of a solid waste landfill unit that meets specified requirements. The Sunset Date for Section 25150.7 is January 1, 2021, and as of that date, is repealed. SB 68 would have extended the statutory provisions authorizing alternative management standards for treated wood

waste indefinitely. However, SB 68 was vetoed and as of January 1, 2021, all hazardous treated wood waste not exempted by Section 25143.1.5 must be stored and manifested as hazardous waste and transported to class I hazardous waste landfills for disposal.

In FY 2021/22, SB 158 (Senate Budget Committee, c. 73) was signed into law on July 12, 2021. It enacted a number of DTSC related reforms, including establishing the Board of Environmental Safety within DTSC to provide policy direction to the Director, restructured the Hazardous Waste Control Account (HWCA) and the fees deposited into it, modified the Toxic Substances Control Account and the Environmental Fee deposited into it, created a Hazardous Waste Facilities Account (HWFA) within HWCA, and made various other changes to statutes DTSC implements related to permitting of facilities and financial assurance requirements. Specifically, related to fees, effective for fees collected in FY 2023/24, SB 158 eliminated the Disposal, Manifest User and EPA ID Verification fees, restructured and revised the fee rates for the Facility Fee, restructured and renamed the Generator Fee to be the Generation and Handling Fee, and revised the fee rates, and revised the Environmental Fee rates. SB 158 also created an additional account, the Hazardous Waste Facility Account, into which Facility Fee revenues are to be deposited, and from which expenditures related to hazardous waste facilities are to be appropriated. In addition to revising the rates for each of the fees, SB 158 also revised the timing of fee payments to coincide with the fiscal year, and established authority for the Board of Environmental Safety to revise each of the fee rates administratively to generate revenues that reflect the amount the Legislature appropriates from each of the relevant accounts.

## Glossary of Acronyms/Abbreviations

- AB = Assembly Bill
- BOE= California State Board of Equalization (the predecessor agency to CDTFA)
- CDTFA = California Department of Tax and Fee Administration (formerly BOE)
- c. = Chapter
- CCR = California Code of Regulations
- CUPA = Certified Unified Program Agency
- CPI = Consumer Price Index
- CY = Calendar Year
- DTSC = Department of Toxic Substances Control
- EPA = Environmental Protection Agency
- FY = Fiscal Year
- H&SC = California Health and Safety Code
- HWCA = Hazardous Waste Control Account
- ID = Identification
- ISD = Interim Status Documents
- PBR = Permit-by-Rule
- RCRA = Federal Resource Conservation Recovery Act
- SB = California Senate Bill
- Stats. = Statutes
- TSCA = Toxic Substances Control Account
