

# DTSC PUBLIC NOTICE

**Department of Toxic Substances Control** – Our mission is to protect the people, communities, and environment of California from harmful chemicals by cleaning up contaminated sites, enforcing hazardous waste laws, and compelling the development of safer products.

## **EMERGENCY PERMIT**

**UNIVERSITY OF CALIFORNIA-DAVIS**

**2201 ENVIRONMENTAL SERVICES LANE**

**DAVIS, CALIFORNIA 95616**

The California Department of Toxic Substances Control (DTSC) has issued an Emergency Permit to University of California-Davis (UCD) for onsite treatment of expired chemicals at 2201 Environmental Services Lane, Davis, California 95616. The items to be treated include one (1) containers of Tetrahydrofuran, one (1) container of Acryloyl Chloride, one (1) container of Acrolein, one (1) container of Styrene, one (1) container of 2,4 Dinitrophenylhydrazine, one (1) container of Benzoyl Peroxide. The Clean Harbors Environmental Services (Clean Harbors) has been contracted to conduct this treatment. The chemicals are potentially reactive and unsafe for transport in its present state. The treatment involves the addition of liquid solution to the containers to stabilize the chemicals. Once the chemicals are treated, they will be transported offsite for proper management. DTSC has determined that the chemicals pose an imminent and substantial endangerment to human health and the environment if not responsibly managed. Therefore, an emergency permit should be issued. This Emergency Permit is effective from September 28, 2022 through November 27, 2022. The Emergency Permit includes measures to minimize any adverse impact to the community and the environment.

**CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA):** DTSC has determined that the issuance of this permit is exempt from the requirements of CEQA and has filed a Notice of Exemption (NOE) with the State Clearinghouse. The Emergency Permit, NOE, UCD's request for this project are available for review at the file room located at:
