

# DTSC PUBLIC NOTICE

*DTSC's Mission is to protect California's people, communities, and environment from toxic substances, to enhance economic vitality by restoring contaminated land, and to compel manufacturers to make safer consumer products.*

## EMERGENCY PERMIT – TRILINK BIOTECHNOLOGIES

The California Department of Toxic Substances Control (DTSC) issued an Emergency Permit to TriLink BioTechnologies for onsite treatment of expired chemicals at 10770 Wateridge Circle, Suite 100 San Diego, CA 92121. The items to be treated include two containers of T-Butyl Vinyl Ether, and one container of Dimethylformamide Dimethyl Acetal.

Clean Harbors Environmental Services was contracted to conduct this treatment to govern its operation stabilizing potentially unstable containers. The chemicals are potentially reactive and unsafe for transport in their present state. The treatment involves the addition of liquid solution to the containers to stabilize the chemicals. Once the chemicals are treated, they will be moved offsite for proper management. DTSC determined that the chemicals pose an imminent and substantial endangerment to people and the environment if not properly managed. This Emergency Permit is effective from February 3, 2023, through April 3, 2023. The Emergency Permit includes measures to minimize any adverse impact to the community and the environment.

**CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA):** DTSC determined that the issuance of this permit is exempt from the requirements of CEQA and filed a Notice of Exemption (NOE) with the State Clearinghouse. The Emergency Permit, NOE and Hexcel Corporation's request for this project are available for review at the file room located at:

DTSC Sacramento Regional Office  
8800 Cal Center Drive  
Sacramento, California 95826
