

Emergency permit to manage hazardous waste

The California Department of Toxic Substances Control (DTSC) has issued an **Emergency Permit to Genia Technologies Inc. for onsite treatment of an expired chemical at 2841 Scott Boulevard, Santa Clara, California 95050**. The items treated include three (3) 100-milliliter containers of Tetrahydrofuran.

Clean Harbors Environmental Services (Clean Harbors) has been contracted to conduct the treatment. The chemical is potentially reactive and unsafe for transport in its present state. The treatment involves the addition of a solution to the containers to stabilize the chemical. Once the chemical is treated, it will be transported offsite for proper management. DTSC has determined that this chemical poses an imminent and substantial endangerment to human health and the environment if not properly managed. **Therefore, an Emergency Permit should be issued. This Emergency Permit is effective from December 20, 2024 through February 20, 2025.** The Emergency Permit includes measures to minimize any adverse impact to the community and the environment.

DTSC Sacramento Regional Office - *Administrative Record*, The Emergency Permit, Notice of Exemption (NOE), and Genia Technologies Inc.'s request for this project is available upon request from the Project Manager or for review at the file room located at:

8800 Cal Center Drive, Sacramento, CA 95826

About us: DTSC protects California's people, communities, and environment from toxic substances, to enhance economic vitality by restoring contaminated land, and to compel manufacturers to make safer consumer products.

The **California Environmental Quality Act (CEQA)**: DTSC has determined that the issuance of this permit is exempt from the requirements of CEQA and has filed an (NOE) with the State Clearinghouse.
